Anne Fine

Sniffys Icehouse:

Sniffy's Icehouse Paul Beach, 2000-09-27 Her eyes flickered quickly under her eyelids Raven woke up feeling guilty and confused then she pulled the blanket aside and went out What a disgusting dream A mouse had crawled out from between her legs Up in the sky a big oak tree was dropping the last of its leaves A single crimson leaf let go falling through the lattice of branches ending its life and resting on the damp ground like a splash of blood She watched it fall then looked at the horizon of fuzzy bare trees That made her twenty summers old She fought hard to stay alive all these years and there was nothing to show for it Nothing Nothing Nothing Only one of them was unaccounted for and more importantly useful She wasn't going to go to him Having nobody was better

The Sky Fisherman Craig Lesley, 1996-08-15 Love death coming of age and Native American spiritual beliefs flow together with the forces of nature in this engrossing novel It is a story of loss and redemption family and community the western panorama and the landscape of the heart This is a moving family portrait etched in the rugged terrain of a small town in Oregon

Chilled Tom Jackson, 2015-07-16 A thrilling mystery lifting narrative history of the refrigerator and the process of refrigeration The refrigerator This white box that sits in the kitchen may seem mundane nowadays but it is one of the wonders of 20th century science life saver food preserver and social liberator while the science of refrigeration is crucial not just in transporting food around the globe but in a host of branches on the scientific tree Refrigerators refrigeration and its discovery and applications provide the eye opening backdrop to Chilled the story of how science managed to rewrite the rules of food and how the technology whirring behind every refrigerator is at play unseen in a surprisingly broad sweep of modern life Part historical narrative part scientific mystery lifter Chilled looks at the ice pits of Persia Iranians still call their fridge the ice pit reports on a tug of war between 16 horses and the atmosphere bears witness to ice harvests on the Regents Canal and shows how bleeding sailors demonstrated to ship doctors that heat is indestructible featuring a cast of characters such as the Ice King of Boston Galileo Francis Bacon and the ostracised son of a notorious 18th century French traitor As people learned more about what cold actually was scientists invented machines for making it with these first used in earnest to chill Australian lager The principles behind those white boxes in the kitchen remain the same today but refrigeration is not all about food a refrigerator is needed to make soap penicillin and orange squash without it IVF would be impossible Refrigeration technology has also been crucial in some of the most important scientific breakthroughs of the last 100 years from the discovery of superconductors to the search for the Higgs boson And the fridge will still be pulling the strings behind the scenes as teleporters and intelligent computer brains turn our science fiction vision of the future into fact
