this recollection of his life This unique and honest series of personal essays expresses the thoughts of a farmer a hunter a husband a father and grandfather a man with a soft spot for mules and dogs and all kinds of people Snow s prose reveals much about a way of life in the region during the first half of the twentieth century as well as the social and political events that affected the entire nation Whether arguing that a good stock dog should be left alone to do its work explaining the process of making swampland suitable for agriculture or putting forth his case for world peace Snow s ideas have a special authenticity because they did not come from an ivory tower or a think tank they came From Missouri *Applied Science* Robert Bud,2024-03-28 For almost two centuries the category of applied science was widely taken to be both real and important Then its use faded How could an entire category of science appear and disappear By taking a longue dur e approach to British attitudes across the nineteenth and twentieth centuries Robert Bud explores the scientific and cultural trends that led to such a dramatic rise and fall He traces the prospects and consequences that gave the term meaning from its origins to its heyday as an elixir to cure many of the economic cultural and political ills of the UK eventually overtaken by its competitor technology Bud examines how applied science was shaped by educational and research institutions sociotechnical imaginaries and political ideologies and explores the extent to which non scientific lay opinion mediated by politicians and newspapers could become a driver in the classification of science **SNOW Series 1.
