Jim Tanner's work would result in some of the most extensive field research ever conducted on the magnificent woodpecker. Drawing on Tanner's personal journals and written with the cooperation of his widow Nancy, *Ghost Birds* recounts in fascinating detail the scientist's dogged quest for the ivory bill as he chased down leads in eight southern states. With Stephen Lyn Bales as our guide, we experience the same awe and excitement that Tanner felt when he returned to the Louisiana wetland he had visited earlier and was able to observe and document several of the ghost birds, including a nestling that he handled, banded, and photographed at close range. Investigating the ivory bill was particularly urgent because it was a fast vanishing species, the victim of indiscriminate specimen hunting and widespread logging that was destroying its habitat. As sightings became rarer and rarer in the decades following Tanner's remarkable research, the bird was feared to have become extinct. Since 2005, reports of sightings in Arkansas and Florida made headlines and have given new hope to ornithologists and bird lovers, although extensive subsequent investigations have yet to produce definitive confirmation. Before he died in 1991, Jim Tanner himself had come to believe that the majestic woodpeckers were probably gone forever, but he remained hopeful that someone would prove him wrong. This book fully captures Tanner's determined spirit as he tracked down what was then, as now, one of ornithology's true Holy Grails.

STEPHEN LYN BALES is a naturalist at the Ijams Nature Center in Knoxville, Tennessee. He is the author of *Natural Histories*, published by UT Press in 2007.

[Our Vanishing Wild Life](#) William Temple Hornaday, 1913. William Temple Hornaday was the Director of the New York Zoological Society and the nation's leading advocate of wildlife conservation in this era. This unsparing manifesto was written to accompany Hornaday's launching of the Permanent Wildlife Protection Fund; it is thus, in the words of the historian Stephen Fox, both a campaign tract and one of the first books wholly devoted to endangered wild animals.

John Muir and His Legacy: The American Conservation Movement. Boston: Little Brown and Company, 1981. p. 149. It is also a landmark of conservation history which had a profound effect on the thought of Aldo Leopold, among others. The book surveys the history and causes of wildlife destruction in America and elsewhere and sets forth a lengthy program to ensure the protection of remaining wildlife for the future, often in militant and moralistic terms. The work also throws light on some of the complexities inherent in the conservation movement at this time; for example, Hornaday accepts the classification of certain bird and mammalian predators as noxious or vermin and appropriate for destruction. pp. 77-81. There is no criticism here of the massive campaign for the extermination of wolves and coyotes being sponsored at the time by the Bureau of Biological Survey. On a more general level, Hornaday's fulminations against Italian immigrants as incorrigible bird killers suggest a connection between nativism and conservationism, while his excoriations of market hunters set forth a deeply rooted class bias shared by many leading conservationists.
