Bailey Penelope Eckert Barbara Johnstone William Labov Ronald Macaulay Lesley Milroy Dennis Preston John Rickford Gillian Sankoff Natalie Schilling Estes Jan Tillery and Walt Wolfram **Quantitative Methods in Sociolinguistics** Ronald Macaulay, 2017-09-16 This detailed textbook critically examines methods used in sociolinguistic studies including the ways in which the categories of age gender ethnicity and social class have been employed to chart language variation It discusses the nature of data and encourages students to examine evidence with a more critical eye Culture and Styles of Academic Discourse Anna Duszak, 2011-06-24 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing *The Anthropology of Learning in Childhood* David F. Lancy, John Bock, Suzanne Gaskins, 2010-01-15 The Anthropology of Learning in Childhood offers a large mural like portrait of childhood across time culture species and environment Even a casual reading of the literature on childhood will persuade one that learning is a very important topic that commands the attention of tens of thousands of scholars and practitioners Yet anthropological research on children has exerted relatively little influence on this community This book will change that The book demonstrates that anthropologists studying childhood can offer a description and theoretically sophisticated account of children s learning and its role in their development socialization and enculturation Further it demonstrates the particular contribution that children s learning makes to the construction of society and culture as well as the role that culture acquiring children play in human evolution Chapters have been contributed in archaeology primatology biological and cultural anthropology and cross cultural psychology **More Than Meets the Ear** Victor H. Matthews, 2008-10-07 This title introduces readers to the various critical communication theories currently being used by scholars in anthropology sociology psychology and literary studies **Subjectivity in a Second Language** Alan J. E. Wolf, 2006 Subjectivity the speaker s expression of self in discourse is a relatively under researched area in the field of applied linguistics this book examines the role of subjectivity in the context of second language use Drawing on insights from discourse analysis and pragmatics it describes how a group of students studying French at degree level at the University of Cambridge England convey expressions of subjectivity in personal narratives and argumentative language In this book the author begins by introducing the reader to key areas in the study of discourse Using

a methodology that has much in common with descriptive linguistics he provides a wide ranging account of how forms in language are used to convey the expression of subjectivity His particular concern is to examine how these markers of subjectivity are used differently by native and non native speakers of French The discussion is carefully supplemented throughout with a variety of exemplification and discourse types including personal narratives in French and English and transcripts of video taped interactions in role plays In the course of his analysis the author questions long held assumptions about the way French is taught in secondary schools and in higher education institutions The range of issues discussed as well as the variety of examples used will make this a valuable book not only for students of applied linguistics but also for any reader wishing to gain a deeper understanding of how the expression of subjectivity can contribute to the learning of a second language
