An Introduction to Social Constructionism Vivien Burr, 2006-07-13 An invaluable clear guide to social constructionism for all perplexed students who want to begin to understand this difficult area Introduction to Social Constructionism is a readable and critical account of social constructionism for students new to the field Focusing on the challenge to psychology that social constructionism poses Vivien Burr examines the notion of personality to illustrate the rejection of essentialism by social constructionists This questions psychology's traditional understanding of the person She then shows how the study of language can be used as a focus for our understanding of human behaviour and experience This is continued by examining discourses and their role in

constructing social phenomena and the relationship between discourse and power. However, the problems associated with these analyses are also clearly outlined. Many people believe that one of the aims of social science should be to bring about social change. Vivien Burr analyses what possibilities there might be for change in social constructionist accounts. She also addresses what social constructionism means in practice to research in the social sciences and includes some guidelines on doing discourse analysis.

The new edition has been updated with relevant and contemporary references to aid understanding of key theoretical and methodological issues. The author additionally utilises new illustrative examples from research and contemporary life such as the MeToo movement, BlackLivesMatter and Post Truth politics. The updated work has also been expanded to include an extended discussion of affect and embodiment and a number of exercises to help illustrate important concepts. **Social Constructionism** extends and updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students of Psychology, Sociology, Education and other related disciplines.
