Patten,2015-06-27 Excerpt from The Social Basis of Religion I Began writing this book with a simple plan which was the welding together of the ideas acquired in two earlier fields of work My Development of English Thought was an endeavor to create an economic interpretation of history This carried to its legitimate consequences would afford the objective basis of social progress I had written also in the field of social psychology From this a subjective view of these same facts is derived Religion seemed to me to be the point of union between these isolated views I thought to use the economic interpretation of history to explain the degenerate tendencies in civilization and then to employ social psychology to set forth the opposing forces of regeneration To put this in another way Degeneration is objective and economic while regeneration is psychic and personal This conforms to the views held by religious reformers and if correct gives a firm basis to religious thought Religion is by this means given a scientific foundation and its doctrines are transferred from the traditional basis to the realm of social science About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Social Basis of Religion** Simon Nelson Patten,1911
