Social Construction Of Literacy:

The Social Construction of Literacy Jenny Cook-Gumperz, 2006-08-17 Literacy the ability to produce and interpret written text has long been viewed as the basis of all school achievement a measure of success that defines both an educated person and an educable one In this volume a team of leading experts raise questions central to the acquisition of literacy Why do children with similar classroom experiences show different levels of educational achievement And why do these differences in literacy and ultimately employability persist By looking critically at the western view of a literate person the authors present a perspective on literary acquisition viewing it as a socially constructed skill whereby children must acquire discourse strategies that are socially approved This extensively revised second edition contains an updated introduction and bibliography This volume will continue to have far reaching implications for educational theory and practice

The Social Construction of Literacy Jenny Cook-Gumperz, 1995

Handbook of Constructionist Research James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein

The Idea of Authorship in Copyright Lior Zemer, 2017-03-02 As information flows become increasingly ubiquitous in our post digital environment the challenges to traditional concepts of intellectual property and the practices deriving from them are immense The romantic understanding of the lone author as an endless source of new creations has to face these challenges In order to do so this work presents a collectivist model of intellectual property rights The core argument is that since copyright works enjoy profit from significant public contribution they should not be privately owned but considered to be a joint enterprise made real by both the public and author It is argued that every copyright work depends on and is reflective of the author's exposure to externalities such as language culture and the various social events and processes that occur in the public domain therefore copyright works should not be regarded as exclusive private property The study takes its organizing principle from John Locke defining and proving the fatal flaw inherent in debates on copyright on the one hand the copyright community is eager to arm authors with a robust property right over their creation while on the other this community totally ignores the fact that the exposure of the individual to externalities is what makes him or her capable of creating material that is copyrightable Just as Locke was against the absolute authority of kings the expressed view of the study is against the exclusive right an author can claim

Towards a Critical Sociology of Reading Pedagogy Carolyn D. Baker,Allan Luke,1991-01-01 Through critical sociological appraisals of literary theory research and pedagogy this volume presents challenges to dominant psychological approaches in reading research and to mainstream discourses about reading and writing pedagogy Bringing together the recent work of literacy researchers in Australia Europe and North America the volume offers novel critiques and theorizations from within political economy neomarxist and critical theory ethnomethodology interactive sociolinguistics poststructuralism and postmodernism The volume is arranged in four sections The Politics of Pedagogy Reading in Classrooms Reconstructing Theory Reading the Social This collection is provocative and innovative offering clear alternatives for conceptualizing literacy for conducting literacy research and for reconstructing the discourses and practices of reading and writing in schools The volume is addressed to a broad audience of researchers educators and students

The Routledge Companion to Accounting Education Richard M.S. Wilson,2014-04-29 Many enquiries into the state of accounting education training undertaken in several countries over the past 40 years have warned that it must change if it is to be made more relevant to students to the accounting profession and to stakeholders in the wider community This book s over riding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education training and which provides a critical overview of the state of this domain including emerging and cutting edge issues as a foundation for facilitating improved accounting education training scholarship and research in order to enhance the educational base of accounting practice The Routledge Companion to Accounting Education highlights the key drivers of change whether in the field of practice on the one hand e g increased

regulation globalisation risk and complexity or from developments in the academy on the other e g pressures to embed technology within the classroom or to meet accreditation criteria on the other Thirty chapters written by leading scholars from around the world are grouped into seven themed sections which focus on different facets of their respective themes including student curriculum pedagogic and assessment considerations
