## **Social History Of Western Europe 1880 1980:**

Blanning, 2001-01-11 Written by an international team of leading scholars The Oxford History of Modern Europe traces Europe's turbulent history from the beginnings of the Revolution in France to the dawn of two World Wars to the breakup of the Soviet Union to today's kaleidoscope of nation states The achievements and failures of key figures from many arenas politics technology warfare religion and the arts among them are drawn vividly and social cultural and economic insights are included alongside the record of geopolitical strife We read of the personality cult as exemplified by the Soviet portraits glorifying Lenin the importance of the nylon stocking in the post World War II economic boom the influence of religion as five new nations Serbia Montenegro Bulgaria Romania and Albania emerged between 1871 and 1914 an influence that continues to be both vigorous and deadly and the confrontation between traditional and modern cultures captured as the railway age began in Russia Beautifully illustrated with over 200 pictures in color and black and white this insightful book offers an unparalleled informed perspective on the history of an ever changing continent German Sociology: T.W. Adorno, M. Horkheimer, G. Simmel, M. Weber, and Others

**Europe Since 1945** Mary Fulbrook, 2001 This text brings home the waves of transformation that have washed across Europe in the second half of the 20th century sketching out general patterns of this change and exploring some of the local themes and variations in parts of Europe **European Integration Since the 1920s** Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re-examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often

overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union

*Comparative and Transnational History* Heinz-Gerhard Haupt,Jürgen Kocka,2012 Since the 1970s West German historiography has been one of the main arenas of international comparative history It has produced important empirical studies particularly in social history as well as methodological and theoretical reflections on comparative history During the last twenty years however this approach has felt pressure from two sources cultural historical approaches which stress microhistory and the construction of cultural transfer on the one hand global history and transnational approaches with emphasis on connected history on the other This volume introduces the reader to some of the major methodological debates and to recent empirical research of German historians who do comparative and transnational work *The Communist Youth League and the Transformation of the Soviet Union, 1917-1932* Matthias Neumann,2012-05-23 The study of Soviet youth has long lagged behind the comprehensive research conducted on Western European youth culture In an era that saw the emergence of youth movements of all sorts across Europe the Soviet Komsomol was the first state sponsored youth organization in the first communist country Born out of an autonomous youth movement that emerged in 1917 the Komsomol eventually became the last link in a chain of Soviet socializing agencies which organized the young Based on extensive archival research and building upon recent research on Soviet youth this book broadens our understanding of the social and political dimension of Komsomol membership during the momentous period 1917 1932 It sheds light on the complicated interchange between ideology policy and reality in the league s evolution highlighting the important role ordinary members played The transformation of the country shaped Komsomol members and their league s social identity institutional structure and social psychology and vice versa the organization itself became a crucial force in the dramatic changes of that time The book investigates the complex dialogue between the Communist Youth League and the regime unravelling the intricate process that transformed the Komsomol into a mere institution for political socialization serving the regime s quest for social engineering and control *The European Heritage* Gerard Delanty,2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a

more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference points

Gorski,2013-01-09 Bourdieu and Historical Analysis explores the usefulness of Pierre Bourdieus thought for analyzing not only the reproduction of social structures but also large scale sociohistorical change **Europe in the Long Twentieth Century** Christoph Cornelissen,2024-10-08 Thanks to their economic and military strength the European empires had achieved global supremacy by 1900 with large parts of the world under their dominance in the wake of colonial expansion This situation fuelled ideas of Europe s permanent almost natural global superiority especially among the middle classes However as early as the First World War such claims came under increasing pressure This volume explains the role played by modern nationalism and anti imperial movements the competition between different political orders changes in the economy and society and the great ideas and utopias Their interplay gave rise to enormously destructive forces in Europe From the Boer and Balkan wars before 1914 to the Yugoslav wars of the 1990s and the Ukraine war since 2022 they have produced a continuum of violence At the same time the great promise of political participation and social security is one of the constants of Europe s history in the long twentieth century Against this backdrop modern societies emerged whose values had moved far away from the older models Perceptions of the role of the sexes families and generations changed fundamentally In addition the major internal European migrations together with the global immigration that became increasingly significant after 1945 ensured that the ethnic profile of European societies changed considerably Europe in the Long Twentieth Century shows how on the one hand these different factors led to a Europeanisation of living and working conditions and at the same time how the political and economic integration of the countries of Europe progressed On the other hand it demonstrates how Europe s role in the global context changed fundamentally As much as the geopolitical provincialisation of Europe continued unabated Europeans were constantly searching for new ways to assert themselves throughout the long twentieth century The search continues Collective Memory and European Identity Willfried Spohn,2016-12-05 Is it possible to create a collective European identity In this volume leading scholars assess the link between collective identity construction in Europe and the multiple memory discourses that intervene in this construction process The authors believe that the exposure of national collective memories to an enlarging communicative space within Europe affects the ways in which national memories are framed Through this perspective several case studies of East and West European memory discourses are presented The first part of the volume elaborates how collective memory can be identified in the new Europe The second part presents case studies on national memories and related collective identities in respect of European integration and its extension to the East This timely work is the first to investigate collective identity construction on a pan European scale and will be of interest to academics and postgraduate students of political sociology and European studies
