The Canvasback On A Prairie Marsh

Paul Johnsgard

The Canvasback On A Prairie Marsh:

The Canvasback on a Prairie Marsh H. Albert (Hans Albert) Hochbaum, 1944 The Canvasback on a Prairie Marsh Hans Albert Hochbaum, 1981 **Marine Birds of the Southeastern United States and Gulf of Mexico: Anseriformes**, 1982 *The North American Whistling-Ducks, Pochards, and Stiffetails* Paul Johnsgard, 2017-03-24 Although the 12 species representing three waterfowl tribes described in this volume are not closely related they fortuitously provide an instructive example of adaptive evolutionary radiation within the much larger waterfowl lineage the family Anatidae especially as to their divergent morphologies life histories and social behaviors The whistling ducks *Dendrocygna* with three known North American species are notable for their permanent pair bonds extended biparental family care and strong social cohesion In contrast males of the five typical pochards of North American diving ducks *Aythya* establish monogamous pair bonds that are maintained only long enough to assure that the female's eggs are fertilized The endpoint of this behavioral gradient promiscuity or polygyny exists among at least some of the typical stiffetails *Oxyura* Such diverse reproductive strategies have exerted powerful evolutionary influences on interspecies variations in sexual dimorphism sexual behavior anatomy ecology and other traits This volume includes more than 63 000 words plus some 200 maps photos drawings and sketches and nearly 650 literature citations It is the last of five volumes that describe all 55 waterfowl species that have been historically documented in North America collectively the volumes total over 300 000 words with nearly 3 000 literature citations and more than 600 maps photos drawings and sketches **A Naturalist's Guide to the Great Plains** Paul A. Johnsgard, 2018 This book documents nearly 500 US and Canadian locations where wildlife refuges nature preserves and similar properties protect natural sites that lie within the North American Great Plains from Canada's Prairie Provinces to the Texas Mexico border Information on site location size biological diversity and the presence of especially rare or interesting flora and fauna are mentioned as well as driving directions mailing addresses and phone numbers or internet addresses as available US federal sites include 11 national grasslands 13 national parks 16 national monuments and more than 70 national wildlife refuges State properties include nearly 100 state parks and wildlife management areas Also included are about 60 national and provincial parks national wildlife areas and migratory bird sanctuaries in Canada's Prairie Provinces Many public access properties owned by counties towns and private organizations are also described **The Biology of Freshwater Wetlands** Arnoud van der Valk, 2012-02-09 A combination of low oxygen levels and dense plant canopies present particular challenges for organisms living in this aquatic habitat The Ecology and Management of Breeding Waterfowl, 1992 **It's a Long Way from Llano** James G. Teer, 2008-09-01 Wildlife management around the world has changed drastically in the last fifty years and veteran biologist James G Teer was a trailblazer for much of that time In this memoir he looks back on his life and on the transformation of his profession A pioneer in managing land for deer Teer became truly global in his conservation efforts From studying waterfowl in Manitoba and monitoring deer herds in the Texas Hill Country Teer was propelled into the

world of big ranches and African safaris working for and traveling with Texas landowners while helping to build the reputation of the wildlife ecology program at Texas A M University As he reminisces Teer gives homage to the men who mentored and taught him and to those whose friendships lasted a lifetime He salutes his colleagues and his students and he confirms his lifelong commitment to the care and stewardship of animals everywhere **Wings over the Great Plains:**

Bird Migrations in the Central Flyway Paul Johnsgard, 2012-11-19 The Central Flyway has been recognized as a collective North South migratory pathway centered on the North American Great Plains for nearly a century but it has never been analyzed as the species that most closely follow it or the major stopping points used by those species on their journeys between their northern breeding and southern wintering grounds A total of 114 U S and 21 Canadian localities of special importance to birds migrating within the Central Flyway are identified and described in detail Judging from available regional state and local information nearly 400 species of 50 avian families regularly use the Central Flyway during their migrations Nearly 90 Central Flyway species have wintering areas partly extending variably far into the Neotropic zoogeographic realm and at least 50 of these winter entirely within the Neotropic realm A few of these species undertake some of the longest known migrations of all birds in excess of 8 000 miles in each direction Seven maps 49 figures and over 100 literature citations are included Abstract *Wildlife Abstracts* U.S. Fish and Wildlife Service, 1954
