Text-critical Methodology and the Pre-Caesarean Text Larry W. Hurtado, 1981 This is a print on demand book and is therefore non returnable This monograph is a detailed examination of the textual characteristics and relationships of important early Greek manuscripts of the Gospel of Mark chiefly Codex Washingtonianus W and also Family 13 and P45 and challenges the generally accepted view that these manuscripts are witnesses to an early stage of the Caesarean text type The study begins with a discussion and critique of previous studies on the Caesarean text type showing the methodological weaknesses that demand a fresh analysis of the data and emphasizing the crucial importance of Codex W for the whole question of the textual history of Mark Then a methodological approach is set forth involving both careful quantitative measurement of manuscript agreements and detailed analysis of variants in the interest of determining both the textual relationships and textual character of manuscripts When this more sophisticated approach is applied to the chief witnesses to the so called pre Caesarean text of Mark it is confirmed that W and P45 do show a significant relationship with each other and that Family 13 is a weaker member of the same group However the commonly held view that these witnesses reflect the early stage of the Caesarean text type is shown to be erroneous In addition to clarifying the textual relationships of the witnesses the study defines more accurately their textual character showing the scribal purposes reflected in the variants that characterize these manuscripts and adding considerably to our knowledge of the forces affecting the early transmission of the text of Mark This is the first detailed examination of the Markan text of Codex W since the publication of the manuscript and the first published book length study dealing with the Caesarean text of Mark since the initial work of Kirsopp Lake and his colleagues Blake and New This work not only addresses a major issue in the textual history of Mark but

offers methodological suggestions for the continuing investigation of the textual history of the New Testament

Caesarean Rosemary Mander, 2007-05-21 This book critically analyzes the place of caesarean in childbearing at the beginning of the twenty first century It questions the changes that are taking place in childbirth and in particular the effects and implications of an increase in caesarean births This controversial work by a practising midwife and researcher includes discussion of the context of the operation and description of it health systems around the world and their caesarean incidence rates decision making and cultural medical constraints the short and long term implications of caesarean for baby and mother Using up to date research Rosemary Mander bases her argument on a firm evidence base and argues that the rapidly rising caesarean section rate may not be for the benefit of either the woman giving birth or her baby Rather the beneficiaries may actually be those professionals whose investment is in extending the range of their influence and thus increasing the medicalization of normal life
