Canadian politics has changed profoundly. The introspective, insular, and largely atheoretical style that informed Canadian political science for most of the postwar period has given way to a deeper engagement with and integration into the global field of comparative politics. This volume is the first sustained attempt to describe, analyze, and assess the comparative turn in Canadian political science. Canada's engagement with comparative politics is examined with a focus on three central questions: In what ways and how successfully have Canadian scholars contributed to the study of comparative politics? How does study of the Canadian case advance the comparative discipline? Finally, can Canadian practice and policy be reproduced in other countries?

Political Support in Canada Richard A. Preston, E. Donald Briggs, 1983. All governments require popular support, and in democracies this support must be maintained by noncoercive means. This book analyzes the question of political support in Canada, a country in which the maintenance of the integrity of the political community has been and continues to be, in the words of the editors, the single most salient aspect of the country's political life. The nature of popular support is first considered in broad theoretical terms, then from the standpoint of those agents most responsible for maintaining support in Canadian democracy, then as influenced by particular issues and policies, and finally as it affects and is affected by the separatist movement in Quebec.
