**Sir William Preece, F.R.S.** Edward Cecil Baker,1976      *Sir William Preece F. R. S. E. C. Baker*,1976-11      *Sir William Preece, F.R.S.* Edward Cecil Baker,1976      **Flat Racing and British Society, 1790-1914** Mike Huggins,2014-06-03 2001 North American Society for Sports History Book of the Year This volume studies the formative period of racing between 1790 and 1914 This was a time when despite the opposition of a respectable minority attendance at horse races betting on horses or reading about racing increasingly became central leisure activities of much of British society      **Masculinity and Science in Britain, 1831-1918** Heather Ellis,2017-01-20 This book offers the first in depth study of the masculine self fashioning of scientific practitioners in nineteenth and early twentieth century Britain Focusing on the British Association for the Advancement of Science founded in 1831 it explores the complex and dynamic shifts in the public image of the British man of science and questions the status of the natural scientist as a modern masculine hero Until now science has been examined by cultural historians primarily for evidence about the ways in which scientific discourses have shaped prevailing notions about women and supported the growth of oppressive patriarchal structures This volume by contrast offers the first in depth study of the importance of ideals of masculinity in the construction of the male scientist and British scientific culture in the nineteenth and early twentieth centuries From the eighteenth century identification of the natural philosopher with the reclusive scholar to early nineteenth century attempts to reinvent the scientist as a fashionable gentleman to his subsequent reimagining as the epitome of Victorian moral earnestness and meritocracy Heather Ellis analyzes the complex and changing public image of the British man of science      **The Communications Miracle** John Bray,2013-11-11      *The Many-Sidedness of George Minchin Minchin* Richard Hornsey,2023-09-29 This book is the first complete biography of George Minchin Minchin 1845 1914 professor of applied mathematics at the Royal Indian Engineering College Minchin s extraordinary range of accomplishments offers a unique inside view of the major technological and educational developments of late nineteenth century Britain The scientific community s excitement during the early days of electromagnetic theory wireless telegraphy and x rays are revealed by Minchin s letters to eminent friends notably the Maxwellians Oliver Lodge and George Francis Fitzgerald This book also traces Minchin s little known pioneering work on photoelectricity which led to the first electrical measurements of starlight and laid the foundations for solar cells and television Minchin s mathematical textbooks were praised for their lucidity and his advanced pedagogical thinking underpinned his lifelong work on reforming science education He explained scientific concepts for a general audience using science fiction poetry and critiqued contemporary society in sharp and humorous satires These works provide fresh perspectives on the place of science in Victorian society This book is for anyone fascinated by the late nineteenth century revolution in electrical technologies This is also a valuable read for historians of science and for those interested in technical education and science and society in Victorian Britain      *Wireless* Sungook Hong,2010-01-22 A new look at the early history of wireless communication By 1897

Guglielmo Marconi had transformed James Clerk Maxwell's theory of electromagnetic waves into a workable wireless telegraphy system and by 1907 Lee de Forest had invented the Audion a feedback amplifier and oscillator that opened the way to practical radio transmission Fifteen years after Marconi's invention wireless had become an essential means of communication as well as a hobby for many This book offers a new perspective on the early days of wireless communication Drawing on previously untapped archival evidence and recent work in the history and sociology of science and technology it examines the substance and context of both experimental and theoretical aspects of engineering and scientific practices in the first years of this technology It offers new insights into the relationship between Marconi and his scientific advisor the physicist John Ambrose Fleming inventor of the vacuum tube It includes the full story of the infamous 1903 incident in which Marconi's opponent Nevil Maskelyne interfered with Fleming's public demonstration of Marconi's syntonic tuning system at the Royal Institution by sending derogatory messages from his own transmitter The analysis of the Maskelyne affair highlights the struggle between Marconi and his opponents the efficacy of early syntonic devices Fleming's role as a public witness to Marconi's private experiments and the nature of Marconi's shows It also provides a rare case study of how the credibility of an engineer can be created consumed and suddenly destroyed The book concludes with a discussion of de Forest's Audion and the shift from wireless telegraphy to radio

**People, Places and Passions** Russell Davies, 2015-06-15

It takes a different view of the history of Wales examining a panorama of different emotions and experiences laughter happiness fear anger adventure lust loneliness anxiety to give an entertaining and exciting new history to Wales a wide range of sources are used to present the ambitions and anxieties which drove and destroyed Welsh people The book's literary style and the fact that it follows earlier successful studies by the author should ensure an audience

Invented by Law Christopher Beauchamp, 2015-01-05 Christopher Beauchamp debunks the myth of Alexander Graham Bell as the telephone's sole inventor exposing that story's origins in the arguments advanced by Bell's lawyers during fiercely contested battles for patent monopoly The courts anointed Bell father of the telephone likely the most consequential intellectual property right ever granted

From Obscurity to Enigma Ido Yavetz, 2011-06-17 Oliver Heaviside's electromagnetic investigations from the publication of his first electrical paper in 1872 to the public recognition awarded to him by Lord Kelvin in 1889 have consistently attracted attention over the years and of late have become a major source for the study of the development of field theory after Maxwell From Obscurity to Enigma is the only comprehensive in depth analysis of Heaviside's work It analyses and elucidates his brilliant but often close to indecipherable Electrical Papers and traces the

evolution of his ideas against the background of growing knowledge in basic electromagnetic theory telegraphy and telephony during these years The book will be appreciated by historians of science and technology in the late 19th and early 20th centuries and by physicists and electrical engineers many of whom are aware of Heaviside's contributions to their respective fields      An Audience with Queen Victoria Ian Lloyd,2019-03-29 One of Britain's most famous and longest serving rulers Queen Victoria saw widespread change across her empire During her sixty three year reign in which she became one of the most powerful and influential people in the world Victoria met everyone from Florence Nightingale to Buffalo Bill as well as royalty from around the world with whom she exchanged truly unique gifts After meeting the exalted monarch her subjects often recorded their impressions of her sometimes favourable and sometimes not and she wasn't shy with her opinion either The records range from her less than enamoured assessment of Greatest Showman P T Barnum and her opinions about Jack the Ripper to how much she enjoyed Jane Eyre and the affection she held for her family An Audience with Queen Victoria examines the meetings and letters exchanged between the Queen and a veritable who's who of her time Through brand new archival research newspapers and interviews with descendants sit right alongside Victoria and for the first time experience queenship from her perspective      **Edison** Ronald Clark,2012-12-17 It is almost a century since Thomas Alva Edison the world's greatest inventor gave the world electric light and exactly one hundred years since he built the first successful phonograph forerunner of the gramophone The man who declared that genius is 1 per cent inspiration and 99 per cent perspiration and who on average lodged a patent every two weeks of his adult life was the most famous American of his day Only now however is it possible to present him clearly against the background of his times and to assess fairly his achievements and his often controversial business and working methods In Edison The Man Who Made The Future first published in 1977 Ronald Clark describes the inventor's early untutored upbringing his struggles in the industrial jungle which grew up in the aftermath of the American Civil War and his vital contributions to what became the motion picture industry A prolific inventor in his own right he was also a developer of other men's ideas A pacifist he became President of the U S Naval Consulting Board in the First World War Thrusting enquiring and determined to leave his mark on history he was perhaps the archetypal American of his era      Thomas Edison Paul Israel,2024-03-18 The most prolific inventor in American history Thomas Edison played a major role in creating industries that have altered life around the globe electric light and power recorded sound and motion pictures He also made significant innovations in telecommunications battery technology office machinery the manufacture of Portland Cement and processes for working low grade ores He was able to contribute to such a wide array of industries because he was not a lone inventor At his workshops and laboratories in Newark Menlo Park and West Orange in New Jersey Edison brought together teams of skilled research assistants and machinists These teams allowed him to do more than any one person could do In the process he transformed invention by making it part of a larger process of research development and commercialization that we now call innovation That transformation as much

as any single invention has become a crucial feature of the modern world Includes a detailed chronology of Edison s life and work An introduction that provides an overview of Edison s life and work The A to Z section includes three hundred encyclopedic entries on Edison s inventions laboratories business enterprises public image and numerous individuals with whom he was associated An extensive bibliography of Edison s publications and select interviews modern contemporaneous and juvenile biographies and thirteen subject areas related to Edison s work and influence The index thoroughly cross references the chronological and encyclopedic entries

**Domesticating Electricity** Graeme Gooday,2016-09-12 This is an innovative and original socio cultural study of the history of electricity during the late Victorian and Edward periods Gooday shows how technology authority and gender interacted in pre World War I Britain The rapid take up of electrical light and domestic appliances on both sides of the Atlantic had a wide ranging effect on consumer habits and the division of labour within the home Electricity was viewed by non experts as potential threat to domestic order and welfare This broadly interdisciplinary study relates to a website developed by the author on the history of electricity

*Reporting the Russo-Japanese War, 1904-5* Peter Slattery,2021-10-01 Large numbers of British military and naval officers as well as journalists and others observed the Russo Japanese War from close quarters But there was one journalist in particular the Times correspondent Lionel James who made war reporting history by gaining access to the conflict zone of the war at sea and reporting by wireless from a specially chartered ship as the action happened The full details of this remarkable and highly dangerous exploit have been carefully pieced together from official Times records and other sources by Peter Slattery and recorded here for the first time including the story of how the vital 180 foot timber wireless mast was built on the British leased tree less promontory of Weihaiwei on the China coast James s first report was published in The Times on 15 March

1904 he subsequently went on to file many other despatches including the sinking of the Russian flag ship the Petropavlovsk. The World Powers however were not ready to accept that a mere journalist should be allowed to exploit the new wireless technology to gain reporting advantage and forced James to give up causing him to move inland into Manchuria to continue his reporting of the war. From there he was to send a 5000 word story on one of the major land battles of the war at Liaoyang, the longest cable ever filed. There was also the matter of James' special deal with the Japanese Imperial Navy which only now has come to light.
