Sir William Preece, F.R.S. Edward Cecil Baker,1976 **Sir William Preece F. R. S.** E. C. Baker,1976-11 *Sir William Preece, F.R.S.* Edward Cecil Baker,1976 The Age of Edison Ernest Freeberg,2014-01-28 A sweeping history of the electric light revolution and the birth of modern America The late nineteenth century was a period of explosive technological creativity but more than any other invention Thomas Edison s incandescent light bulb marked the arrival of modernity transforming its inventor into a mythic figure and avatar of an era In The Age of Edison award winning author and historian Ernest Freeberg weaves a narrative that reaches from Coney Island and Broadway to the tiniest towns of rural America tracing the progress of electric light through the reactions of everyone who saw it and capturing the wonder Edison s invention inspired It is a quintessentially American story of ingenuity ambition and possibility in which the greater forces of progress and change are made by one of our most humble and ubiquitous objects **Nikola Tesla and the Electrical Future** Iwan Rhys Morus,2019-07-04 This crisply succinct beautifully synthesized study brings to life Tesla his achievements and failures and the hopeful thrum of an era before world wars Nature Nikola Tesla is one of the most enigmatic curious and controversial figures in the history of science An electrical pioneer as influential in his own way as Thomas Edison he embodied the aspirations and paradoxes of an age of innovation that seemed to have the future firmly in its grasp In an era that saw the spread of power networks and wireless telegraphy the discovery of X rays and the birth of powered flight Tesla made himself synonymous with the electrical future under construction but opinion was often divided as to whether he was a visionary a charlatan or a fool Iwan Rhys Morus examines Tesla s life in the context of the extraordinary times in which he lived and worked colourfully evoking an age in which anything seemed possible from capturing the full energy of Niagara to communicating with Mars Shattering the myth of the man out of time Morus demonstrates that Tesla was in all ways a product of his era and shows how the popular image of the inventor as maverick outsider was deliberately crafted by Tesla establishing an archetype that still resonates today *Flat Racing and British Society, 1790-1914* Mike Huggins,2014-06-03 2001 North American Society for Sports History Book of the Year This volume studies the formative period of racing between 1790 and 1914 This was a time when despite the opposition of a respectable minority attendance at horse races betting on horses or reading about racing increasingly became central leisure activities of much of British society *The Communications Miracle* John Bray,2013-11-11 **Masculinity and Science in Britain, 1831-1918** Heather Ellis,2017-01-20 This book offers the first in depth study of the masculine self fashioning of scientific practitioners in nineteenth and early twentieth century Britain Focusing on the British Association for the Advancement of Science founded in 1831 it explores the complex and dynamic shifts in the public image of the British man of science and questions the status of the natural scientist as a modern masculine hero Until now science has been examined by cultural historians primarily for evidence about the ways in which scientific discourses have shaped prevailing notions about women and supported the

growth of oppressive patriarchal structures This volume by contrast offers the first in depth study of the importance of ideals of masculinity in the construction of the male scientist and British scientific culture in the nineteenth and early twentieth centuries From the eighteenth century identification of the natural philosopher with the reclusive scholar to early nineteenth century attempts to reinvent the scientist as a fashionable gentleman to his subsequent reimagining as the epitome of Victorian moral earnestness and meritocracy Heather Ellis analyzes the complex and changing public image of the British man of science

The Many-Sidedness of George Minchin Minchin Richard Hornsey, 2023-09-29 This book is the first complete biography of George Minchin Minchin 1845 1914 professor of applied mathematics at the Royal Indian Engineering College Minchin s extraordinary range of accomplishments offers a unique inside view of the major technological and educational developments of late nineteenth century Britain The scientific community s excitement during the early days of electromagnetic theory wireless telegraphy and x rays are revealed by Minchin s letters to eminent friends notably the Maxwellians Oliver Lodge and George Francis Fitzgerald This book also traces Minchin s little known pioneering work on photoelectricity which led to the first electrical measurements of starlight and laid the foundations for solar cells and television Minchin s mathematical textbooks were praised for their lucidity and his advanced pedagogical thinking underpinned his lifelong work on reforming science education He explained scientific concepts for a general audience using science fiction poetry and critiqued contemporary society in sharp and humorous satires These works provide fresh perspectives on the place of science in Victorian society This book is for anyone fascinated by the late nineteenth century revolution in electrical technologies This is also a valuable read for historians of science and for those interested in technical education and science and society in Victorian Britain

Wireless Sungook Hong, 2010-01-22 A new look at the early history of wireless communication By 1897 Guglielmo Marconi had transformed James Clerk Maxwell s theory of electromagnetic waves into a workable wireless telegraphy system and by 1907 Lee de Forest had invented the Audion a feedback amplifier and oscillator that opened the way to practical radio transmission Fifteen years after Marconi s invention wireless had become an essential means of communication as well as a hobby for many This book offers a new perspective on the early days of wireless communication Drawing on previously untapped archival evidence and recent work in the history and sociology of science and technology it examines the substance and context of both experimental and theoretical aspects of engineering and scientific practices in the first years of this technology It offers new insights into the relationship between Marconi and his scientific advisor the physicist John Ambrose Fleming inventor of the vacuum tube It includes the full story of the infamous 1903 incident in which Marconi s opponent Nevil Maskelyne interfered with Fleming s public demonstration of Marconi s syntonic tuning system at the Royal Institution by sending derogatory messages from his own transmitter The analysis of the Maskelyne affair highlights the struggle between Marconi and his opponents the efficacy of early syntonic devices Fleming s role as a public witness to Marconi s private experiments and the nature of Marconi s shows It also

provides a rare case study of how the credibility of an engineer can be created consumed and suddenly destroyed The book concludes with a discussion of de Forest s Audion and the shift from wireless telegraphy to radio **William Crookes**

(1832-1919) and the Commercialization of Science William Hodson Brock,2008 William Crookes long life was one of unbroken scientific and business activity culminating in his appointment as President of the Royal Society in 1913 Discoverer of thallium inventor of the radiometer investigator of cathode rays spiritualist journalist editor businessman celebrity his extraordinary life and career provide a unique window into the world of Victorian and Edwardian science **People, Places**

Alexander Graham Bell as the telephone s sole inventor exposing that story s origins in the arguments advanced by Bell s lawyers during fiercely contested battles for patent monopoly The courts anointed Bell father of the telephone likely the most consequential intellectual property right ever granted *From Obscurity to Enigma* Ido Yavetz,2011-06-17 Oliver Heaviside

s electromagnetic investigations from the publication of his first electrical paper in 1872 to the public recognition awarded to him by Lord Kelvin in 1889 have consistently attracted attention over the years and of late have become a major source for the study of the development of field theory after Maxwell *From Obscurity to Enigma* is the only comprehensive in depth analysis of Heaviside s work It analyses and elucidates his brilliant but often close to indecipherable Electrical Papers and traces the evolution of his ideas against the background of growing knowledge in basic electromagnetic theory telegraphy and telephony during these years The book will be appreciated by historians of science and technology in the late 19th and early 20th centuries and by physicists and electrical engineers many of whom are aware of Heaviside s contributions to their respective fields **Edison** Ronald Clark,2012-12-17 It is almost a century since Thomas Alva Edison the world s greatest

inventor gave the world electric light and exactly one hundred years since he built the first successful phonograph forerunner of the gramophone The man who declared that genius is 1 per cent inspiration and 99 per cent perspiration and who on average lodged a patent every two weeks of his adult life was the most famous American of his day Only now however is it possible to present him clearly against the background of his times and to assess fairly his achievements and his often controversial business and working methods In *Edison The Man Who Made The Future* first published in 1977 Ronald Clark describes the inventor s early untutored upbringing his struggles in the industrial jungle which grew up in the aftermath of the American Civil War and his vital contributions to what became the motion picture industry A prolific inventor in his own right he was also a developer of other men s ideas A pacifist he became President of the U S Naval Consulting Board in the

timber wireless mast was built on the British leased tree less promontory of Weihaiwei on the China coast James s first report was published in The Times on 15 March 1904 he subsequently went on to file many other despatches including the sinking of the Russian flag ship the Petropavlovsk The World Powers however were not ready to accept that a mere journalist should be allowed to exploit the new wireless technology to gain reporting advantage and forced James to give up causing him to move inland into Manchuria to continue his reporting of the war From there he was to send a 5000 word story on one of the major land battles of the war at Liaoyang the longest cable ever filed There was also the matter of James special deal with the Japanese Imperial Navy which only now has come to light
