across the deep Cynfal gorge was Ffestiniog a pack of slate grey elephants following their leader the unsteeped church down a spur of hill towards the valley Behind and above stood the Moelwyn range I was smoking my second cigarette when I heard Plaxy s voice in the distance It was her voice that had first attracted me to her Sitting in a cafe I had been enthralled by that sensitive human sound coming from some unknown person behind me And now once more I heard but did not see her For a moment I listened with delight to her speech which as I had often said was like the cool sparkling talk of small waves on the pebbly shore of a tarn on a hot day I rose to meet her but something strange arrested me Interspersed with Plaxy s remarks was no other human voice but a quite different sound articulate but inhuman Just before she came round the corner of the house she said But my dear don t dwell on your handlessness so You have triumphed over it superbly There followed a strange trickle of speech from her companion then through the gate into the garden came Plaxy and a large dog *Sirius: a Fantasy of Love and Discord Annotated* William Olaf Stapledon, 2021-04-13 Sirius is Thomas Trelone s great experiment a huge handsome dog with the brain and intelligence of a human being Raised and educated in Trelone s own family alongside Plaxy his youngest daughter Sirius is a truly remarkable and gifted creature His relationship with the Trelones particularly with Plaxy is deep and close and his inquiring mind ranges across the spectrum of human knowledge and experience But Sirius isn t human and the conflicts and inner turmoil that torture him cannot be resolved **Sirius** Olaf Stapledon, 2022-05-17 Olaf Stapledon s *Sirius* is a groundbreaking work of speculative fiction that delves into the existential struggles of a genetically enhanced dog Set against the backdrop of a post World War I society grappling with technological advances and ethical dilemmas the novel articulately blends philosophical themes with an innovative narrative style Stapledon s prose is both lyrical and introspective layering rich imagery with profound meditations on consciousness love and the nature of being The character of Sirius serves as a vehicle for exploring the boundaries between humanity and animality inviting readers to reconsider their definitions of identity and intelligence in an increasingly mechanized world Olaf Stapledon was an English writer and philosopher known for his visionary approach to science fiction His extensive background in philosophy led him to explore complex ethical and metaphysical questions in his fiction Influenced by contemporary developments in psychology biology and technology Stapledon s work often reflects his desire to illuminate the larger component of human existence *Sirius* emerged during a transformative era marked by uncertainty reflecting Stapledon s own concerns about humanity s future and its relationship to the other beings sharing the planet *Sirius* is a must read for enthusiasts of speculative fiction and philosophical literature alike Stapledon s masterful storytelling and deep thematic exploration invite readers to embark on a thought provoking journey that transcends simple anthropocentrism In an age marked by questions of genetic modification and artificial intelligence this text resonates powerfully urging us to reflect on what it truly means to be sentient *Sirius (Sci-Fi Novel)* Olaf Stapledon, 2023-11-12 In *Sirius* Olaf Stapledon weaves a profound narrative that explores the intersection of intelligence identity and the nature of being through the lens of a

Modernism and Time Machines Tung Charles M. Tung, 2019-03-14 Bridging modernist studies and science fiction scholarship Modernism and Time Machines places the fascination with time in canonical works of twentieth century literature and art side by side with the rise of time travel narratives and alternate histories in popular culture Both modernism and this cardinal trope of science fiction produce a range of effects and insights that go beyond the exhilarations of simply sliding back and forth in history Together the modernist time obsession and the fantasy of moving in time help us to rethink the shapes of time the consistency of timespace and the nature of history

Animals and Science Maggie Bolton, Cathrine Degnen, 2020-05-15 What exactly does a focus on animals bring to anthropological studies of science This is a question that the various contributors to this edited collection set out to answer This range of studies explores the intersections between animals and science across different ethnographic settings and in different historical periods The contributions to this volume look at what it means to be human the place of human beings vis vis other species on this planet our ideas of what nature and culture are the limits to our ideas of kinship the ethical debates that surround science together with their interpretation by both scientific communities and the lay public and the moral comportment of scientists Through focusing on science our contributors not only demonstrate that people elsewhere have different relationships with and knowledge of beasts and that different possibilities of relating to animals exist within our own Western worldview but further

suggest that our Western knowledge about animals and their positions in society arrived at through Western science and the social sciences is itself in need of rethinking to incorporate other ways of knowing This volume contends that accounts in which animals meet science provide important theoretical insights for anthropologists and can set new agendas for theory in anthropology and science studies

Colonialism and the Emergence of Science Fiction John Rieder,2013-01-01 This groundbreaking study explores science fiction s complex relationship with colonialism and imperialism In the first full length study of the subject John Rieder argues that the history and ideology of colonialism are crucial components of science fiction s displaced references to history and its engagement in ideological production With original scholarship and theoretical sophistication he offers new and innovative readings of both acknowledged classics and rediscovered gems Rider proposes that the basic texture of much science fiction in particular its vacillation between fantasies of discovery and visions of disaster is established by the profound ambivalence that pervades colonial accounts of the exotic other Includes discussion of works by Edwin A Abbott Edward Bellamy Edgar Rice Burroughs John W Campbell George Tomkyns Chesney Arthur Conan Doyle H Rider Haggard Edmond Hamilton W H Hudson Richard Jefferies Henry Kuttner Alun Llewellyn Jack London A Merritt Catherine L Moore William Morris Garrett P Serviss Mary Shelley Olaf Stapledon and H G Wells
