the Nobel attaches a brilliant face to a story of profound discovery making moving headlines In *Geniuses Heroes and Saints* Massimiano Bucchi tells an equally compelling story of the Nobel s transformation of science into an epic pursuit legible both to the field and to the public bound up with the currents of historical change Three main narratives characterize the Nobel The scientist as genius portrayed as a creative visionary an exceptional intellect reflecting a solitary and romantic ideal of great communicative impact The scientist as national hero acts as a surrogate of competition among nations in a peaceful rational contest The scientist as saint shines with moral exceptionality a figure worthy of celebration and worship known for virtues such as modesty humility and total dedication body and soul to the scientific enterprise Whether the recipient was Albert Einstein or a countryside doctor toiling for years in obscurity whether the prize was worthily given or awarded to work later disproved or whether we even remember the honorees today the Nobel defined the image of science in the twentieth century Bucchi shows an image that still lives in all sorts of fascinating ways today
