Urban Guerrilla Warfare Anthony Joes, 2007-04-20

Guerrilla insurgencies continue to rage across the globe fueled by ethnic and religious conflict and the easy availability of weapons. At the same time urban population centers in both industrialized and developing nations attract ever increasing numbers of people outstripping rural growth rates worldwide. As a consequence of this population shift from the countryside to the cities guerrilla conflict in urban areas similar to the violent response to U S occupation in Iraq will become more frequent. **Urban Guerrilla Warfare** traces the diverse origins of urban conflicts and identifies similarities and differences in the methods of counterinsurgent forces. In this wide ranging and richly detailed comparative analysis Anthony James Joes examines eight key examples of urban guerrilla conflict spanning half a century and four continents: Warsaw in 1944, Budapest in 1956, Algiers in 1957, Montevideo and S o Paulo in the 1960s, Saigon in 1968, Northern Ireland from 1970 to 1998, and Grozny from 1994 to 1996. Joes demonstrates that urban insurgents violate certain fundamental principles of guerrilla warfare as set forth by renowned military strategists such as Carl von Clausewitz and Mao Tse tung. Urban guerrillas operate in finite areas leaving themselves vulnerable to encirclement and ultimate defeat. They also tend to abandon the goal of establishing a secure base or a cross border sanctuary making precarious combat even riskier. Typically urban guerrillas do not solely target soldiers and police; they often attack civilians in an effort to frighten and disorient the local population and discredit the regime. Thus urban guerrilla warfare becomes difficult to distinguish from simple terrorism. Joes argues persuasively against committing U S troops in urban counterinsurgencies but also offers cogent recommendations for the successful conduct of such operations where they must be undertaken.

Mobilizing nature Chris Pearson, 2017-10-03. *Mobilizing nature* traces the environmental history of war and militarisation in France from the creation of Ch lons Camp in 1857 to military environmentalist policies in the twentieth century. It offers a fresh perspective on the well known histories of the Franco Prussian War, Western Front 1914-18, Second World War, Cold War, and the anti base campaign at Larzac whilst uncovering the largely hidden history of the numerous military bases and other installations that pepper the French countryside. *Mobilising nature* argues that the history of war and militarisation can only be fully understood if human and environmental histories are considered in tandem. Preparing for and conducting wars were only made possible through the active manipulation and mobilisation of topographies, climatic conditions, vegetation, and animals. But the military has not monopolised the mobilisation of nature. Protesters against militarisation have consistently drawn on images of peaceful and productive civilian environments as the preferable alternative to destructive tanks and bombs. Written in an accessible style, *Mobilizing nature* will appeal to readers interested in modern France, environmental history, military geographies, and histories of anti military protests and environmentalism.

Great Warrior Leaders/thinkers, 1989. 1945 Gregor Dallas, 2005-01-01. A masterpiece of historical writing dramatizing the chaos, mistakes, and unexpectedness that ushered in the Cold War.

Terror and Triumph Pat Seward, 2011. *World War II* explores the elements of the war in broadly chronological order, not just on the battlefields but also on home fronts around the world.
