- **Descartes and Skepticism:** if we can find a foundation for our belief system which is both
  - 1) self evidently true, and
  - 2) sufficiently powerful to enable us to deduce that our perceptual beliefs are true, THEN we could escape the skeptical argument.

**Rule-Following Skepticism in Contemporary Epistemology** Gopal Sahu, 2017-01-01 The book explains the much talked about rule following skepticism and its attempted solutions in the contemporary epistemology Kripke's rule following skeptic by demonstrating the possibility of multiple interpretations of a given rule poses serious problem for rule governed behaviours and objectivity and necessity of knowledge Kripke's skepticism is equally applicable to Goodman's new riddle of induction and Quine's indeterminacies After a critical discussion of different suggested solutions the book aims to provide a straight solution to the problem from a Wittgensteinian perspective It argues that the necessity and objectivity of knowledge can be recognized by noting the universal aspect of rules The normativity of the linguistic rules is provided in the form of human commitment to rules and their following One and the same sentence can be shown to be true empirically analytically and metaphysically in the language Thus it provides the highest order of necessity which includes metaphysical scientific and the logical The book will benefit the philosophers and social scientists in theoretical understanding of issues related to rule and its following framing policies and guidelines

An Appraisal of Hume's Scepticism in Epistemology James Alabi, 2018-12-03 Seminar paper from the year 2018 in the subject Philosophy Theoretical Realisation Science Logic Language grade 9 9 University of Ibadan language English abstract What assures us of existences and objects we do not see or feel In other words what leads us to form beliefs about unobserved matters of fact that the sun will rise tomorrow that Africa still exists that the Normans won the Battle of Hastings What is the correct account of causation Since this ancient epoch skepticism has taken a central in fact the driving seat in epistemology with attitude among philosophers particularly epistemologists apparently tending to regard a skeptic as a foe rather than a friend a threat rather than a tool and a deconstructionist rather than a builder Ironically the troubling skepticism forms the foundation of all epistemological enterprise With the historical development of epistemology one could possibly establish a self contradiction any attempt deny the skeptic position of Protagoras that there are many events that hinder and deny us of an indubitable sure and stable knowledge The ancient period prepared the ground for inquiry but the medieval dark age almost collapsed this foundation with recourse to faith and subjection of reason to the dogmatism of the instrument of faith However there was resurgence in the modern era of philosophical reflection with several attempts to restore reason back to its rightful place in philosophy One of those philosophers who attempted to rescue epistemology from the unphilosophical and dogmatic theologism was David Hume Of course the methodic doubt scepticism of Rene Descartes French rationalist was pivotal to all other discussions in the modern period However Hume's resurgent effort was to see that inquiry is once again made into the nature of things including claims about and of God human life scientific processes and procedures causation and inductive reasoning Hume's effort was to mitigate skepticism and forge a veritable mid point and alliance between what can be known and what cannot be said to be known Well his thought on the endorsement of a priori propositions and some part of a posteriori propositions

and rejection of some such as causation and inductive reasoning has earned him such appellation as a thorough going skeptic and empiricist Our concern in the paper is to take a second but critical investigation into Hume s idea of causation vis vis the appellation The paper attempts to literally play the devil s advocate to examine if such appellation could pass for Hume

Essays in Epistemology and Beyond* ,2022-10-17 This book of original papers offers fresh approaches to skepticism a topic in philosophy with a noble two millennia history and one that even inaugurated modern philosophy in Descartes s Meditations Particularly with the rise of scientific forms or models of philosophy skepticism today is often treated as a dead end not worthy of serious reflection In contrast to this prevailing attitude the skepticisms discussed in these pages are alive Here are assembled leading thinkers who claim at least some forms of skepticism to be true e g skepticism about ethics or metaphysics or insightful enough to be a lasting source of philosophical enlightenment and inspiration

**Formal Epistemology and Cartesian Skepticism** Tomoji Shogenji,2017-11-15 This book develops new techniques in formal epistemology and applies them to the challenge of Cartesian skepticism It introduces two formats of epistemic evaluation that should be of interest to epistemologists and philosophers of science the dual component format which evaluates a statement on the basis of its safety and informativeness and the relative divergence format which evaluates a probabilistic model on the basis of its complexity and goodness of fit with data Tomoji Shogenji shows that the former lends support to Cartesian skepticism but the latter allows us to defeat Cartesian skepticism Along the way Shogenji addresses a number of related issues in epistemology and philosophy of science including epistemic circularity epistemic closure and inductive skepticism

**Epistemology and Cognition** Alvin I. Goldman, 1986 Against the traditional view Alvin Goldman argues that logic probability theory and linguistic analysis cannot by themselves delineate principles of rationality or justified belief The mind's operations must be taken into account Hegel and Skepticism Michael N. Forster, 1989 The rejection by Anglo Saxon philosophers of much continental philosophy from Hegel on down is largely based on the perceived failure of continental thinkers to grapple with the tough questions of epistemology in general and skepticism in particular Forster demonstrates that Hegel did not in fact ignore epistemology but on the contrary he fought a tireless and subtle campaign to defeat the threat of skepticism Forster's work should dispel once and for all the view that Hegel was naive or careless in epistemological matters Forster begins by discussing Hegel's critical interpretation of the skeptical tradition in particular his convincingly argued case for the superiority of ancient over modern skepticism He goes on to show that the difficulties characteristic of ancient skepticism play a crucial and fascinating role in Hegel's philosophy of history Hegel sees in the emergence of these difficulties an explanation of why the harmonious unified Greek culture collapsed and was replaced by the division and alienation characteristic of subsequent western culture Finally Forster examines the elaborate and ingenious system of defenses erected by Hegel to protect his philosophical thought against skeptical difficulties as the core of a somewhat broader epistemological project Along the way Forster makes much that has hitherto remained obscure in Hegel's texts intelligible for the first time This book should cause a re-evaluation of Hegel and German Idealism generally and contribute to a re-evaluation of the skeptical tradition in philosophy Epistemology Laurence Bonjour, 2010 In *Epistemology* Laurence Bonjour introduces the serious philosophy student to the history and concepts of epistemology while simultaneously challenging them to take an active part in its ongoing debates The text reflects Bonjour's conviction that the place to start any discussion of the theories of knowledge is with the classical problems beginning with and centered around Descartes *Problems in Epistemology and Metaphysics* Steven B. Cowan, 2020-02-06 Problems in Epistemology and

Metaphysics takes a pro and con approach to two central philosophical topics Each chapter begins with a question Can We Have Knowledge How are Beliefs Justified What is the mind Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters covering core questions surrounding religious beliefs scientific knowledge truth being and reality this is a comprehensive introduction to debates lying at the heart of what we know how we know it and the nature of the world we live in **Ghazālī's**

**Epistemology** Nabil Yasien Mohamed, 2023-11-17 Focusing on Abū al-Ghazālī (1111-1111) one of the foremost scholars and authorities in the Muslim world who is central to the Islamic intellectual tradition this book embarks on a study of doubt, shakḥ and certainty (yaqīn) in his epistemology The book looks at Ghazālī's attitude to philosophical demonstration and Sufism as a means to certainty In early scholarship surrounding Ghazālī he has often been blamed as the one who single handedly offered the death blow to philosophy in the Muslim world In much of contemporary scholarship Ghazālī is understood to prefer philosophy as the ultimate means to certainty granting Sufism a secondary status Hence much of previous scholarship has either focused on Ghazālī as a Sufi or as a philosopher this book takes a parallel approach and acknowledges each discipline in its right place It analyses Ghazālī's approach to acquiring certainty his methodological scepticism his foundationalism his attitude to authoritative instruction (ta'līm) and the place of philosophical demonstration and Sufism in his epistemology Offering a systematic and comprehensive approach to Ghazālī's epistemology this book is a valuable resource for scholars of Islamic philosophy and Sufism in particular and for educated readers of Islamic studies in general Chinese-Western

Comparative Metaphysics and Epistemology Mingjun Lu, 2020-10-23 Chinese Western Comparative Metaphysics and Epistemology A Topical Approach features a comparative analysis of the fundamental metaphysical assumptions and their epistemological implications in Chinese and Western philosophy Adopting the methodology of topical comparison that seeks to correlate two or multiple approaches to the same set of questions raised by a single topic or issue Mingjun Lu argues for commensurability in Chinese and Western metaphysics of both Nature and the mind and in the epistemology of knowledge dictated by these two fundamental hypotheses of the first principle or primary cause Lu explores this philosophical commensurability through a comparative analysis of the canonical works written by Plato Aristotle Bacon Descartes and Leibniz on the Western side and by Confucius Laozi Zhuangzi Xunzi Lu Jiuyuan Zhu Xi and Wang Yangming on the Chinese side The parallels and analogues revealed by the comparative lens Lu proposes bring to light a coherent and well developed Chinese metaphysical and epistemological system that corresponds closely to that in the West By inventing such new categories as cosmo substantial metaphysics consonant epistemology natural hermeneutics and onto mind reading to reconceptualize Chinese and Western philosophy Lu suggests alternative and more commensurable grounds of comparison
