embodied dimensions of crime and victimization the particular characteristics of crime within late modern late capitalist culture and the role of criminology itself in constructing the reality of crime In this sense cultural criminology not only offers innovative theoretical models for making sense of crime criminality and crime control but presents as well a critical theory of criminology as a field of study This collection is designed to highlight each of these dimensions of cultural criminology its theoretical foundations its current theoretical trajectories and its broader theoretical critiques by presenting the best of cultural criminological work from the United States Europe Australia and elsewhere Aztlán and Arcadia Roberto Ramon Lint Sagarena, 2014 In the wake of the Mexican American War competing narratives of religious conquest and re conquest were employed by Anglo American and ethnic Mexican Californians to make sense of their place in North America These invented traditions had a profound impact on North American religious and ethnic relations serving to bring elements of Catholic history within the Protestant fold of the United States national history as well as playing an integral role in the emergence of the early Chicano a movement Many Protestant Anglo Americans understood their settlement in the far Southwest as following in the footsteps of the colonial project begun by Catholic Spanish missionaries In contrast Californios Mexican Americans and Chicana os stressed deep connections to a pre Columbian past over to their own Spanish heritage Thus as Anglo Americans fashioned themselves as the spiritual heirs to the Spanish frontier many ethnic Mexicans came to see themselves as the spiritual heirs to a southwestern Aztec homeland
