Mountains of Memories and Myths Naomi Bryson, 2014-09-15

Where did you come from? How did you get here? These questions came from people who had not seen black skiers before. Black people can't endure cold temperatures is a myth that has been held by Caucasians and some black people. Black skiers enjoy gliding, sliding, and riding on the cold and snowy mountains. The myths that black people don't ski and that black people are too lazy to learn will be dispelled. There are countless stories of their experiences on the snowy mountains, their volunteer services, networking, finding love, and the friendships over the years. *Towards Disaster Risk Reduction* Jason K.

Levy, Chennat Gopalakrishnan, 2014-10-29 This book constitutes a landmark attempt to address comprehensively and in depth a policy focused approach to the many timely and important issues associated with building a culture of disaster prevention and disaster risk reduction. This book not only provides key insights into the field of natural hazard and disaster studies but also assesses the causes, perspectives, and consequences of natural disasters as well as providing a global survey of post recovery policies. The contributions found herein discuss disaster risk reduction strategies and policies for managing the unexpected and cascading impacts of natural disasters. A particular focus is placed on transboundary catastrophes that cross policy domains, geographic, political, and sectoral boundaries. Since the disaster management and natural resources policy research field draws on a diverse range of paradigms and influences, the book includes case histories, empirical studies, conceptual, theoretical investigations, policy perspectives, institutional analysis, and risk analyses. The role of human culture, disaster psychology, and environmental monitoring are examined in depth. Deficiencies and inequalities in local, national, and global disaster response are also discussed. Original strategies for reducing disaster risk are put forward, and the prospects for a major change in the direction of global policy on disasters are discussed. This book was published as a special issue of the *Journal of Natural Resources Policy Research*.
