Magoc, 2002      So Glorious a Landscape Chris J. Magoc, 2002 An anthology of period documents that illustrate important facets of Americans changing relationship with nature      **Teaching for EcoJustice** Rita J. Turner, 2015-05-22 Teaching for EcoJustice is a unique resource for exploring the social roots of environmental problems in humanities based educational settings and a curriculum guidebook for putting EcoJustice Education into practice It provides model curriculum materials that apply the principles of EcoJustice Education giving pre and in service teachers the ability to review examples of specific secondary and post secondary classroom assignments lessons discussion prompts and strategies that encourage students to think critically about how modern problems of sustainability and environmental destruction have developed their root causes and how they can be addressed The author describes instructional methods she uses when teaching each lesson and shares insights from evaluations of the materials in her classroom and by other teachers Interspersed between lessons is commentary about the rationale behind the materials and observations about their effect on students      **Romantic Anti-capitalism and Nature** Robert Sayre, Michael Löwy, 2019-10-16 Romantic Anti capitalism and Nature examines the deep connections between the romantic rebellion against modernity and ecological concern with modern threats to nature The chapters deal with expressions of romantic culture from a wide variety of different areas travel writing painting utopian vision cultural studies political philosophy and activist socio political writing The authors discuss a highly diverse group of figures William Bartram Thomas Cole William Morris Walter Benjamin Raymond Williams and Naomi Klein from the late eighteenth to the early twenty first century They are rooted individually in English American and German cultures but share a common perspective the romantic protest against modern bourgeois civilisation and its destruction of the natural environment Although a rich ecocritical literature has developed since the 1990s particularly in the United States and Britain that addresses many aspects of ecology and its intersection with romanticism they almost exclusively focus on literature and define romanticism as a limited literary period of the late eighteenth and early nineteenth centuries This study is one of the first to suggest a much broader view of the romantic relation to ecological discourse and representation covering a range of cultural creations and viewing romanticism as a cultural critique or protest against capitalist industrialist modernity in the name of past pre modern or pre capitalist values This book will be of great interest to students and scholars of ecology romanticism and the history of capitalism      Chronology of Americans and the Environment Chris J. Magoc, 2011-02-18 Covering the 17th century to the contemporary era this chronological overview of the role of the environment provides many insights into one of the most important aspects of American history Environmental issues such as deforestation water pollution extinction of indigenous animal species and climate change have long existed in the United States Fortunately the American people and their

**The Republic of Nature** Mark Fiege, 2012-03-20 In the dramatic narratives that comprise *The Republic of Nature* Mark Fiege reframes the canonical account of American history based on the simple but radical premise that nothing in the nation's past can be considered apart from the natural circumstances in which it occurred Revisiting historical icons so familiar that schoolchildren learn to take them for granted he makes surprising connections that enable readers to see old stories in a new light Among the historical moments revisited here a revolutionary nation arises from its environment and struggles to reconcile the diversity of its people with the claim that nature is the source of liberty Abraham Lincoln an unlettered citizen from the countryside steers the Union through a moment of extreme peril guided by his clear eyed vision of nature's capacity for improvement In Topeka Kansas transformations of land and life prompt a lawsuit that culminates in the momentous civil rights case of *Brown v Board of Education* By focusing on materials and processes intrinsic to all things and by highlighting the nature of the United States Fiege recovers the forgotten and overlooked ground on which so much history has unfolded In these pages the nation's birth and development pain and sorrow ideals and enduring promise come to life as never before

making a once familiar past seem new The Republic of Nature points to a startlingly different version of history that calls on readers to reconnect with fundamental forces that shaped the American experience For more information visit the author s website <http://republicofnature.com>      *Folk Nation* Simon J. Bronner, 2002 This lively reader traces the search for American tradition and national identity through folklore and folklife from the 19th century to the present Through an engaging set of essays Folk Nation shows how American thinkers and leaders have used folklore ranging from Paul Bunyan and Davey Crockett to quilts cowboys and immigrants to express the meaning and mystique of their country Simon Bronner has carefully selected statements by public intellectuals and popular writers as well as by scholars all chosen for their readability and significance as provocative texts during their time The common thread running throughout is the value of folklore in expressing or denying an American national tradition
