So Called Second Grammatical Treatise An:

The Poetic Genesis of Old Icelandic Literature Mikael Males, 2019-12-16 This book assesses the importance of poetry for the Old Icelandic literary flowering of c 1150-1350. It addresses the apparent paradox that an extremely conservative form of literature, namely skaldic poetry, was at the core of the most innovative literary and intellectual experiments in the period. The book argues that this cannot simply be explained as a result of strong local traditions as in most previous scholarship. Thus, for instance, the author demonstrates that the mix of prose and poetry found in kings sagas and sagas of Icelanders is roughly contemporary to the written sagas. Similarly, he argues that treatises on poetics and mythology, including Snorri's Edda, are new to the period, not only in their textual form but also in their systematic mode of analysis. The book contends that what is truly new in these texts is the method of the authors, derived from Latin learning but applied to traditional forms and motifs as encapsulated in the skaldic tradition. In this way, Christian Latin learning allowed for its perceived opposite, vernacular oral literature of pagan extraction, to reach full fruition and to largely replace the very literature which had made this process possible in the first place.

Linguistic Historiography E.F.K. Koerner, 1999-09-15 The present volume brings together the author's most recent thinking on the tasks and methods of linguistic historiography and his critical assessment of the legacy of a number of major 20th-century scholars. Some of the chapters are revisions of previously published articles which, together with new materials, have been welded into a coherent volume.

Professing Linguistic Historiography E.F.K. Koerner, 1995-11-24 The volume brings together recent papers by the author, selected to form a broad picture of his teachings, all of them revised and updated, either addressing particular topics in the History of Linguistics Part I or offering historical accounts of linguistic subfields Part II. In altogether 10 chapters: 1. Persistent Issues in Linguistic Historiography 2. Metalanguage in Linguistic Historiography 3. The Natural Science Impact on Theory Formation in 19th and 20th Century Linguistics 4. Saussure and the Question of the Sources of his Linguistic Theory 5. Chomsky's Readings of the Cours de linguistique générale 6. Toward a History of Modern Sociolinguistics 7. Toward a History of Americanist Linguistics 8. Toward a History of Linguistic Typology 9. History and Historiography of Phonetics: A state of the art account and 10. The Sapir-Whorf Hypothesis: An historico-bibliographical essay. Index of authors, index of subjects, terms.

The Development of Education in Medieval Iceland Ryder Patzuk-Russell, 2021-02-08 Medieval Iceland is known for the fascinating body of literary works it produced, from ornate court poetry to mythological treatises to sagas of warrior poets and feud culture. This book investigates the institutions and practices of education which lay behind not only this literary corpus but the whole of medieval Icelandic culture, religion and society. By bringing together a broad spectrum of sources, including sagas, law codes and grammatical treatises, it

addresses the history of education in medieval Iceland from multiple perspectives. It shows how the slowly developing institutions of the church shaped educational practices within an entirely rural society with its own distinct vernacular culture. It emphasizes the importance of Latin despite the lack of surviving manuscripts and teaching and learning in a highly decentralized environment. Within this context it explores how medieval grammatical education was adapted for bilingual clerical education which in turn helped create a separate and fully vernacularized grammatical discourse.

A History of Old Norse Poetry and Poetics Margaret Clunies Ross, 2005. Accessible guide to and description of the medieval poetic tradition in Scandinavia. This is the first book in English to deal with the twin subjects of Old Norse poetry and the various vernacular treatises on native poetry that were a conspicuous feature of medieval intellectual life in Iceland and the Orkneys from the mid twelfth to the fourteenth centuries. Its aim is to give a clear description of the rich poetic tradition of early Scandinavia particularly in Iceland where it reached its zenith and to demonstrate the social contexts that favoured poetic composition from the oral societies of the early Viking Age in Norway and its colonies to the devout compositions of literate Christian clerics in fourteenth century Iceland. The author analyses the two dominant poetic modes eddic and skaldic giving fresh examples of their various styles and subjects looks at the prose contexts in which most Old Norse poetry has been preserved and discusses problems of interpretation that arise because of the poetry's mode of transmission. She is concerned throughout to link indigenous theory with practice beginning with the pre-Christian ideology of poets as favoured by the god dinn and concluding with the Christian notion that a plain style best conveys the poet's message. Margaret Clunies Ross is McCaughey Professor of English Language and Early English Literature and Director of the Centre for Medieval Studies at the University of Sydney.

History of Linguistics Volume II Giulio C. Lepschy, 2014-09-19. This comprehensive history of linguistics is part of a 5 volume set. Together the volumes examine the social cultural and religious functions of language its place in education the prestige attached to different varieties of language and the presentation of lexical and grammatical descriptions. They explore the linguistic interests and assumptions of individual cultures in their own terms without trying to transpose and reshape them into the context of contemporary ideas of what the scientific study of language ought to be. The authors of individual chapters are all specialists who have been able to analyse the primary sources and so produce original syntheses which offer an authoritative view of the different traditions and periods. Volume Two examines the Greek Roman and Medieval European traditions which between them developed the grammatical and syntactical models which form the basis of our inherited linguistic assumptions.

Companion Species Mathilde van Dijk, 2024-11-28. This book explores the connection between saints and animals and how the power over animals has been a characteristic of saints from their beginnings in the Early Church. The connection between saints and humans is examined with the saint as a human rising beyond humanity touching the divine and the non human animal as a creature which is connected to and yet removed from humanity and which may have a connection to the sacred itself. This volume transcends traditional religious boundaries by

including Christian saints as well as similar figures in Islam and Norse religions It operates on the cusp of two exciting and innovative fields hagiographic and animal studies It shows the complexities of human animal interaction and the sacred authorities clashing with experiential knowledge metaphorical animals as opposed to real animals ranging from helpers or opponents of saints disguises of demons or identity markers of a human community Companion Species will be of value to scholars and students interested in medieval history Europe and religion as well as social and cultural history **Versatility in Versification** Nordiskt Sällskap för Metriska Studier. Conference, 2009 Versatility in Versification grew out of an international conference organized by the University of Iceland and the Nordic Society for Metrical Studies and held at Reykholt Iceland the thirteenth century home of Snorri Sturluson Although medieval Icelandic poetic culture was highlighted at the conference the range of subjects remained diverse and discussion became dynamic Similarly this volume brings together the work of a broad range of scholars who embark on a discourse across disciplines addressing aspects of poetry and poetics within the Germanic language family in particular The subjects range from runic metrical inscriptions to literature and poetics of the modern day the medieval period becoming a nexus of attention through which the various subjects in this historical scope are interwoven and united Approaches range from theoretical linguistics and generative metrics to cognitive theory and folkloristics The discourse initiated at the conference has both continued and expanded during this volume's evolution and it has significantly enriched the development of the individual chapters which variously treat meters their relationships to language and poetics in application These diverse subjects and approaches form remarkable constellations of complementary relationships and continue to engage in a discourse to the immense benefit of the reader *Germanic Dialects* Bela Brogyanyi, Thomas Krömmelbein, 1986-01-01 This volume seeks to present Germanic philology with its main linguistic literary and cultural subdivisions as a whole and to call into question the customary pedagogical division of the discipline
