by showing how the analysis of various topics reinforces one another Thus buses can tell us something about schools and optimal tolls about land prices Brendan O Flaherty looks at almost everything through the lens of Pareto optimality and potential Pareto optimality how policies affect people and their well being not abstract entities such as cities or the economy or growth or the environment Such traditionalism leads to radical questions however Should cities have police and fire departments Should tax preferences for home ownership be repealed Should public schools charge for their services O Flaherty also gives serious consideration to such heterodox policies as pay at the pump auto insurance curb rights for buses land taxes marginal cost water pricing and sidewalk zoning
