Dempsey, 1989-09-11 The author discusses the question of federal preemption of intrastate transportation and the experience of intrastate deregulation in some states He examines the issue of whether more deregulation is in the public interest and if economic deregulation is to be retained what form it should take The author s summary and conclusions can be the basis for study of the effects of economic deregulation in the transportation industry This book can be a resource for executives dealing with deregulation in such industries as transportation telecommunications broadcasting electric utilities cable television oil and gas and securities and banking *Defense Transportation Journal* This book provides a comprehensive assessment of the social and economic consequences of one of America s most important infrastructure industries transportation Dr Dempsey traces the legal and political movement from regulation to deregulation He proceeds to review the empirical results of a decade of deregulation upon airlines railroads trucking and bus companies and the effects of deregulation upon the shipping and traveling public that rely upon them The book begins with an analysis of the events that led our nation to establish a regime of economic regulation upon the transportation industry It also examines the metamorphosis toward deregulation and focuses on several areas in which there has been a significant adverse impact including economic efficiency pricing service and safety Dempsey s book addresses the question of federal preemption of intrastate transportation and the experience of intrastate deregulation in some states Dempsey further examines the issue of whether more deregulation is in the public interest and if economic regulation is to be retained what form it should take The book concludes with an analysis of the public interest in transportation focusing upon the policy objectives essential in accomplishing social and economic goals beyond allocative efficiency This book is a necessary resource for executives dealing with deregulation in such industries as transportation telecommunications broadcasting electric utilities cable television oil and gas and securities and banking **The Journal of Agricultural Economics Research** ,1990

Towards Sustainable Aviation Paul Upham, Janet Maughan, David Raper, Callum Thomas, 2012-06-25 Aviation is integral to the global economy but it is also one of the main obstacles to environmentally sustainable development It is one of the world s fastest growing and most polluting industries What can be done to retain the economic and other benefits it brings without the associated pollution noise congestion and loss of countryside In this volume industry policy and research experts examine how to address the problems and what it would take to achieve genuinely sustainable aviation looking at technological policy and demand management options Without far reaching changes the problems caused by aviation can only multiply and worsen This work seeks to take an important step in diagnosing the problems and in pointing towards their solutions *The Antitrust Division of the Department of Justice* Theodore P. Kovaleff, 2016-09-16 Analyzes the newly available statistical evidence on income distribution in the former Soviet Union both by social group and by republic and

considers the significance of inequalities as a factor contributing to the demise of the Communist regime *The Private Abuse of the Public Interest* Lawrence D. Brown, Lawrence R. Jacobs, 2009-05-15 Despite George W Bush's professed opposition to big government federal spending has increased under his watch more quickly than it did during the Clinton administration and demands on government have continued to grow Why Lawrence Brown and Lawrence Jacobs show that conservative efforts to expand markets and shrink government often have the ironic effect of expanding government's reach by creating problems that force legislators to enact new rules and regulations Dismantling the flawed reasoning behind these attempts to cast markets and public power in opposing roles *The Private Abuse of the Public Interest* urges citizens and policy makers to recognize that properly functioning markets presuppose the government's ability to create sustain and repair them over time The authors support their pragmatic approach with evidence drawn from in depth analyses of education transportation and health care policies In each policy area initiatives such as school choice deregulation of airlines and other carriers and the promotion of managed care have introduced or enlarged the role of market forces with the aim of eliminating bureaucratic inefficiency But in each case the authors show reality proved to be much more complex than market models predicted This complexity has resulted in a political cycle strikingly consistent across policy spheres that culminates in public interventions to sustain markets while protecting citizens from their undesirable effects Situating these case studies in the context of more than two hundred years of debate about the role of markets in society Brown and Jacobs call for a renewed focus on public private partnerships that recognize and respect each sector's vital and fundamentally complementary role **Transportation Journal** ,1994 **The Economic Effects of Airline Deregulation** Steven Morrison, Clifford Winston, 2010-12-01 In 1938 the U S Government took under its wing an infant airline industry Government agencies assumed responsibility not only for airline safety but for setting fares and determining how individual markets would be served Forty years later the Airline Deregulation Act of 1978 set in motion the economic deregulation of the industry and opened it to market competition This study by Steven Morrison and Clifford Winston analyzes the effects of deregulation on both travelers and the airline industry The authors find that lower fares and better service have netted travelers some 6 billion in annual benefits while airline earnings have increased by 2.5 billion a year Morrison and Winston expect still greater benefits once the industry has had time to adjust its capital structure to the unregulated marketplace and they recommend specific public policies to ensure healthy competition Transport Planning and Policy Issues University of Waterloo.
