Social Citizenship In The Shadow Of Competition:

Social Citizenship in the Shadow of Competition Bronwen Morgan, 2017-11-30 Social Citizenship in the Shadow of Competition explores how economic concepts and tools are reshaping regulatory law Building on studies that link law both institutionally and discursively to the legitimization of economic neo liberalism the book charts lawmakers attempts to justify social welfare regulation in the language imposed by economic theory It presents new qualitative findings from an ambitious regulatory reform programme targeting over 1 700 pieces of legislation Bronwen Morgan argues that the interplay between economic discourse and lawmaking does not destroy the possibility of social citizenship however the subsequent regulatory conversations frequently silence or weaken the claims of vulnerable groups Thus even when vulnerable groups secure instrumental success economic conceptions of bureaucratic rationality impoverish their capacity to express certain kinds of intangible values and aspirations To expand or retain social citizenship requires that we learn to conceive of what matters in political economy without relying on the logic of utility or other instrumental rationalities Consumer Protection in the Age of the 'Information Economy' Jane K. Winn, 2013-01-28 This volume considers the impact of technological innovation on the foundations of consumer advocacy contracting behaviour control over intellectual capital and information privacy A unique and timely perspective on these issues is presented by internationally renowned experts who provide novel approaches to the question of what consumer protection might consist of in the context of technological innovation **International Responses to Issues of Credit and Over-indebtedness in the Wake of Crisis** Therese Wilson, 2016-04-22 This book explores the political economic and regulatory context in which credit regulation is taking place following the global financial crisis It suggests that current neoliberal economic policies favour multi national corporations rather than consumers and examines regulatory responses to the internationalization of consumer finance protection Detailing how EU consumers have been affected by national economic conditions the book also analyses the lending regimes of Europe Australia the US and South Africa and offers suggestions for responsible lending to avoid over indebtedness and corrupt mortgage lending Finally new approaches and directions for consumer credit regulations are outlined such as protection for small businesses protection against risky credit products reorganization of mortgage securitization and the possibility of a partnership model to address financial exclusion The book includes contributions from leading names in the field of consumer law and will be invaluable to those interested in banking business and commercial law *Transnational Law and State Transformation* Jennifer Lander, 2019-11-07 This book contributes new theoretical insight and in depth empirical analysis about the relationship between transnational legality state change and the globalisation of markets The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism the power to institute new rules and limits for national states This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives While leading

scholars in the field have emphasised the much needed value of case studies there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution This monograph addresses this empirical gap whilst expanding the theoretical scope of the field Mongolia's recent transformation as a mineral exporting country provides a rare opportunity to witness economic and legal globalisation in process Based on careful empirical analysis of national law and policy making the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia's mining sector specifically by redistributing state power in relation to the market sub national administrations and civil society The book investigates the role of international financial institutions multinational corporations and non governmental organisations in normative transmission as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment As the book demonstrates however the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation institutionally and ideologically The book will be of interest to scholars of international law global governance and the political economy of development

Handbook of Research on International Consumer Law Geraint G. Howells, I. Ramsay, Thomas Wilhelmsson, 2010 This is a truly international effort and one with a strong commitment to human rights by the highly reputable authors coming from different jurisdictions The many facets of today's consumer law are presented to the reader including developing countries a fascinating effort in a dynamically emerging field of law We are comprehensively informed about such bread and butter areas as advertising unfair terms consumer guarantees product safety and liability consumer credit and redress But traditional consumer law concepts and remedies are facing challenges in more complex areas like services of general internet where consumers and private users should enjoy equal access to universal services with the internet where speed must not be a pretext to eliminate standards of fair dealing with risky investment services under the problematic paradigm shift from investor protection to investor confidence A book to read to think about to work with for everybody interested in the future of consumer markets and law in a time of economic crisis Norbert Reich University of Bremen Germany This is a richly interesting collection of essays written by leading names in the field It offers a thoroughly reliable survey of key tensions and challenges in modern consumer law and brilliantly combines thematic overview with detailed analysis It will stimulate comparative thinking it will provide a source of information and it will be welcomed by consumer law scholars all over the world Stephen Weatherill University of Oxford UK Consumer law and policy has emerged in the last half century as a major policy concern for all nations This Handbook of original contributions provides an international and comparative analysis of central issues in consumer law and policy in developed and developing economies The Handbook encompasses questions of both social policy and effective business regulation Many of the issues are common to all countries and are becoming increasingly globalised due to the growth in international trade and technological

developments such as the Internet The authors provide a broad coverage of both substantive topics and institutional questions concerning optimal approaches to enforcement and the role of class actions in consumer policy It also includes comparative insights into the influential EU and US models of consumer law and relates consumer law to contemporary trends in human rights law Written by a carefully selected group of international experts this text represents an authoritative resource for understanding contemporary and future developments in consumer law This Handbook will provide students researchers and policymakers with an insight to the main policy debates in each context and provide models of legal regulation to assist in the evaluation of laws and the development of consumer law and policy **Global Business, Local**

Law Amanda Perry-Kessaris, 2016-04-22 This volume establishes a theoretical framework for exploring the role of host state legal systems courts and bureaucracies in mediating relations between foreign investment civil society and government actors It then demonstrates the application of that framework in the context of the south Indian city of Bengaluru formerly Bangalore Drawing on the law and community approach of Roger Cotterrell the volume identifies three mechanisms through which law might in theory ensure that social relations are productive by expressing any mutual trust which may hold actors together by ensuring that actors participate fully in social life and by coordinating the differences that hold actors apart Empirical data reveals that each of these legal mechanisms is at work in Bengaluru However their operation is limited and skewed by the extent to which actors use abuse and or avoid them Furthermore these legal mechanisms are being eroded as a direct result of the World Bank's investment climate discourse which privileges the interests and values of foreign investors over those of other actors **The Unmanageable Consumer** Yiannis Gabriel, Tim Lang, 2015-09-21 The Unmanageable

Consumer has long been one of my favorite books in the sociology of consumption This long overdue third edition has updated and revised the basic argument in many ways Most importantly it now offers a new chapter on the consumer as worker or more generally the prosumer Assign it to your classes I have and will again and read it for your edification George Ritzer Distinguished University Professor University of Maryland USA Western style consumerism is often presented as unstoppable yet its costs mount and its grip on consumer reality weakens In this 20th Anniversary edition Gabriel and Lang restate their thesis that consumerism is more fragile and unmanageable than is assumed by its proponents Consumerism has been both stretched and undermined by globalization the internet social media and other cultural changes Major environmental threats debt squeezed incomes and social inequalities now temper Western consumers appetite for spending The 20th century Deal first championed by Henry Ford of more consumption from higher waged work looks tattered This edition of The Unmanageable Consumer continues to explore 10 different consumer models and encourages analysis of contemporary consumerism It looks at the spread of consumerism to developing countries like India and China and considers the effects of demographic changes and migration and points to new features such as consumers taking on unwaged work New to this edition Coverage of new phenomenon such as social media and emerging markets Explores contemporary topics

including the occupy movement and horsemeat scandal A new chapter on the consumer as worker This is a remarkable and important book The new edition updates consumer cultural studies to take into account austerity politics and the economic crisis and the impact these have had on how we think about and experience everyday practices of shopping and consuming The authors also build on and maintain the lively and challenging argument from the previous volumes which sees the consumer as an unstable space for a multiplicity of often contradictory responses which can unsettle the various strategies on the part of contemporary capitalism to have us buy more Angela McRobbie Goldsmiths University of London The book exemplifies how social science should be engaged insightful imaginative scholarly and highly socially and politically relevant Strongly recommended to students academics as well as all people interested in understanding our time and themselves in an age of consumerism and false promises Mats Alvesson Professor of Business Administration Lund University Sweden

The Embedded Firm Cynthia A. Williams,Peer Zumbansen,2011-08-11 The globalization of capital markets since the 1980s has been accompanied by a vigorous debate over the convergence of corporate governance standards around the world towards the shareholder model But even before the financial and economic crisis of 2008 2009 the dominance of the shareholder model was challenged with regard to persisting divergences and national differences in corporate law labor law and industrial relations This collection explores this debate at an important crossroads echoing Karl Polanyi s famous observation in 1944 of the disembeddedness of the market from society Drawing on pertinent insights from scholars practitioners and regulators in corporate and labor law securities regulation as well as economic sociology and management theory the contributions shed important light on the empirical effects on the economy of the shift to shareholder primacy in light of a comprehensive reconsideration of the global context policy goals and regulatory forms which characterize market governance today

Lawyers and Regulation Patrick Schmidt,2005-06-23 This book is a close study of lawyers who practise occupational safety and health law in the United States using detailed interview and survey data to explore the roles that lawyers have as representatives of companies unions and OSHA the Occupational Safety and Health Administration Placed in the context of evolving understandings of regulatory politics as a problem of public private interaction and negotiation the book argues that lawyers adapt to multiple roles in what prove to be highly complex settings The core chapters examine stages of the administrative process where various groups attempt to shape the immediate outcomes and the development of OSHA law These stages include administrative rulemaking post rulemaking litigation of government standards regulatory enforcement and compliance counseling by lawyers

The Rise of the Regulatory State of the South Navroz K. Dubash,Bronwen Morgan,2013-06-27 The 1990s and 2000s have witnessed a spurt of energetic institution building in the developing world as regulatory agencies emerge to take over the role of the executive in key sectors This rise of the regulatory state of the south is barely noticed both by scholars of regulation and of development let alone adequately documented and theorized Yet the consequences for the role of the state and modalities of governance in the south are

substantial as politically charged decisions are handed over to formally technocratic agencies creating new arenas and forms of contestation over the gains and losses from development decisions Moreover this shift in the developing world comes at a time when the regulatory state in the north is under considerable stress from the global financial crisis Understanding the regulatory state of the south and particularly forms of accommodation to political pressures could stimulate a broader conversation around the role of the regulatory state in both north and south This volume seeks to provoke such a discussion by empirically exploring the emergence of regulatory agencies of a range of developing countries across Asia Africa and Latin America The cases focus on telecommunications electricity and water sectors that have often been at the frontlines of this transition The central question for the volume is Are there distinctive features of the regulatory state of the South shaped by the political economic context of the global south in the last two decades To assist in exploring this question the volume includes brief commentaries on the case studies from a range of disciplines development economics law and regulation development sociology and comparative politics Collectively the volume seeks to shape the contours of a productive inter disciplinary conversation on the emergence of a significant empirical phenomenon the rise of regulatory agencies in the developing world with implications both for the study of regulation and the study of development
