Social Construction Of Management Texts And Identities:

The Social Construction of Management Nancy Harding, 1999-11-01 **The Social Construction of Management** Nancy Harding, 2004-06 A critical and empirical study that explores the constitution of managerial identities in the age of mass education in management and challenges the way we think about organizations and their management **The Social Construction of Management** Nancy Harding, 2004-06-01 What is management and how do the people who become managers take on a managerial identity How does text inform the manager's identity From cultural studies we understand that the relationship between text and reader is not passive but that each one works upon the other and that text is active in forming the identity of the reader This book is the first to analyse how many management textbooks construct their readers It analyses management textbooks published since the 1950s and shows they construct a world in which chaos is kept at bay only by strong management and in which strong management is based upon the rationality of modernity This book exposes and analyses such claims to truths and theorizes their arguments using the work of Butler and Foucault the sociology of scientific knowledge critical legal studies art history and queer theory By revealing a postmodern turn in management textbooks **The Social Construction of Management** is both a critical and empirical study that explores the constitution of managerial identities in the age of mass education in management An exciting contribution to the growing body of knowledge within critical management studies this book challenges the way we think about organizations and their management and about management education as a whole This is thought provoking reading for anyone studying management or working in the managerial organization **The Oxford Handbook of Identities in Organizations** Andrew D. Brown, 2020-01-16 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has

significant potential to generate multiple compelling streams of theorizing in organization and management studies

Studies on the Social Construction of Identity and Authenticity J. Patrick Williams, Kaylan C. Schwarz, 2020-08-03 As identity and authenticity discourses increasingly saturate everyday life so too have these concepts spread across the humanities and social sciences literatures Many scholars may be interested in identity and authenticity but lack knowledge of paradigmatic or disciplinary approaches to these concepts This volume offers readers insight into social constructionist approaches to identity and authenticity It focuses on the processes of identification and authentication rather than on subjective experiences of selfhood There are no attempts to settle what authentic identities are On the contrary contributors demonstrate that neither identities nor their authenticity have a single or fixed meaning Chapters provide exemplars of contemporary research on identity and authenticity with significant diversity among them in terms of the identities cultural milieu geographic settings disciplinary traditions and methodological approaches considered Contributors introduce readers to a number of established and emerging identity groups from sites around the world from yogis and punks to fire dancers and social media influencers Their conceptual work stretches from the micro analytic to the ethno national as authors employ a variety of qualitative methods including ethnographic fieldwork interviewing and the collection and analysis of naturally occurring interactions Several of the chapters look directly at identification and authentication while others focus on the social and cultural backdrops that structure these practices what unites them is the adoption of social constructionist sensibilities This book will appeal to anyone interested in understanding identity and authenticity

Managerialism T. Klikauer, 2013-09-05 Most people know what management is but often people have vague ideas about Managerialism This book introduces Managerialism and its ideology as a colonising project that has infiltrated nearly every eventuality of human society Management Theory Nanette Monin, 2004-01-22 Building on the rapidly developing interest in guru theory and management fashions this book introduces the idea of scriptive reading to readers of management

Storytelling in Management Practice Stefanie Reissner, Victoria Pagan, 2013-06-03 Since the early 2000s storytelling as a means of managerial communication has been increasingly advocated with a focus on the management practices of leadership change and organizational culture Most research on storytelling in management practice derives from practitioner experience but little is known about the specific dynamics behind storytelling as a tool for managerial communication This book derives from one of the first research studies into storytelling in management practice which sought to evaluate the assumed but not necessarily proven effectiveness of storytelling as a management tool Building on existing theories of narrative and storytelling in organizations the book explores how managers use storytelling in their daily practice revealing that it can be employed both purposively like a tool and perceptively spontaneously and intuitively The book explains that storytelling has different functions in management practice at different levels of the organization such as Creating direction for the organization Translating strategic messages into operational ones and supporting the professional development of staff Shaping the organization's social fabric through the sharing of personal stories Aided by a wealth of interviews and case studies Storytelling in Management Practice reveals

an analysis of the dynamic relationship between story storyteller audience and organizational context As such it will be useful for students and researchers working across a variety of sub disciplines including leadership organizational behaviour and business communication
