Topic: Culture | Words: 282 | Pages: 1

The definitions of race and ethnicity seem to be often confused, and usually, the line between them blurs, and people do not use the terms correctly. At first, there was no difference between these two concepts, and I believed that race implies specific cultural features and characteristics. However, over time through considerable research and readings, I realized that it only defines the physical and biological aspects of the people (Blakemore, 2019). In turn, ethnicity determines the cultural side of the people and includes the traditions, customs, and common historical background (Blakemore, 2019). I always had a precise understanding of this term, although usually, I assigned the same characteristics to the race. Thus, the race is about the biological specifics, and ethnicity has the cultural and historical context underneath it.

Despite the fact that both race and ethnicity are deeply interconnected and extremely important in defining human nature from a social perspective, it is impossible to separate one from another, but some have more power and influence in society. While race is associated with biological features, it is related to the supposed cultural background that the representatives of a certain race might have. However, it is not entirely accurate, and often it is more complicated than it may seem at first. For instance, Asian people can be born in European countries and among the European traditions and, despite their physical characteristics, hardly have something in common with their origins. It eventually will determine the person more since they learned from the specific culture that may not match their race according to the common assumptions. Therefore, ethnicity is more important and strongly

Discourse on Inequality in France and Britain John Edwards, Jean-Paul Révauger, 2018-10-03 Published in 1998 this volume consists of 16 edited papers presented at an Anglo French conference on inequality in France in March 1997 The purpose of this book is to bring together ideas and perceptions of inequality in the two countries across several areas including multi ethnicity education social work housing and health presented by experts in these fields and in cultural studies The purpose is not comparative in the traditional sense but rather to analyze the different meanings and conceptions that apply to inequality in France and Britain and to demonstrate how these differences affect policies as well as what is considered to be legitimate grounds for policy intervention This approach to social policy in Europe pays attention to the cultural meanings of concepts like inequality and demonstrates that comparative social policy can only be properly productive when it acknowledges that key words like poverty inequality citizenship social rights and insertion exclusion carry with them quite different ideological moral and social meanings in two countries such as Britain and France

the Boundaries of Race & Class Bonnie T. Dill, 2015-12-22 First published in 1994 Almost fifteen years after this study was written many social changes have occurred affecting domestic service yet some things remain the same Among the changes are the increased labor force participation rates of women and the resultant rise in the demand for private household help This volume is part of the Studies on African American History and Culture series looking at the role occupation impact of race and employee relationships of black domestic servants It also includes three case studies stories of resistant and families and children Across the Boundaries of Race and Class was one of the earliest attempts to examine the ways the structure and organization of housework as women s work influenced the work and family lives of domestic workers As pointed out in the book the women who were the subjects of this study exemplified a pattern of domestic work that was fading even as it was being studied most worked for one family for twenty to thirty years Working with the Mentally Disordered Offender in the Community Phillip J. Vaughan, Douglas Badger, 2013-12-20 In the past forensic psychiatry has been a sub speciality of general psychiatry without its own separate identity However since the mid 1980s there has been a growing interest in the application of community care principles to mentally disordered offenders A new set of attitudes have developed which have enabled the mentally disordered offender to emerge from relative institutional obscurity to a much higher profile in the community Although numerically small in relation to the general psychiatric population forensic patients tend to attract the public s attention by virtue of their greater propensity for troublesome behaviour Such a group needs expert community support in order to maintain an acceptable public face Unfortunately these developments have outstripped the creation of training opportunities for community staff charged with their support and supervision Most community practitioners have had to learn on the job with inadequate support and supervision from senior staff who often have less direct experience of working with this client group than themselves Just such a situation prompted the authors in 1990 to establish a module on Working with Mentally Disordered Offenders in the Community as part of an MA in Social Work at the University of Reading As the course developed it became clear that the topic and content had equal application to other community professionals working in the field *Reconstructing Educational Psychology* Bill Gillham, 2022-03-07 First published in 1978 Reconstructing Educational Psychology presents a new look at topics of central social concern such as

children's rights the community approach to children's problems the inutility of traditional concepts of intelligence and personality the interactionist approach to the concept of deviant behaviour and the invalidity of psychiatric concepts of maladjustment New ideas are the core of the book It begins with historical and personal accounts of the origin and the nature of the situation of educational psychology It spells out the way in which new thinking determines new practice and the extent to which progress has been made The book will be of interest to teachers psychologists as well as to students of pedagogy and psychology

Blacks and Britannity Danièle Joly, 2020-09-29 This title was first published in 2001 Featuring original research concerning young African Caribbeans in Birmingham this book addresses complex issues of urban violence and insecurity racism and discrimination alienation resistance and social networks Employing the methodology of sociological intervention developed by Alain Touraine the book explores the experiences of a group of young people who are simultaneously presumed to be victims and perpetrators of violence It examines their relationship to this violence its meanings for and effects upon them how they constitute themselves as social actors and subjects and their capacity for action The book also addresses the fact that ethnic monitoring and multicultural policies place the question of ethnicity on the British social and political agenda alongside issues of racism and discrimination Exploring both the perceived and personally experienced position of young people within this context it sheds important new light upon processes of group identification and action
