critical rethinking of theories of national imagination *The Dawn That Never Comes* offers the most detailed reading to date in
English of one of modern Japan's most influential poets and novelists Shimazaki Toson 1872-1943 It also reveals how Toson's
works influenced the production of a fluid shifting form of national imagination that has characterized twentieth century
Japan Analyzing Toson's major works Michael K Bourdaghs demonstrates that the construction of national imagination
requires a complex interweaving of varied and sometimes contradictory figures for imagining the national community Many
scholars have shown for example that modern hygiene has functioned in nationalist thought as a method of excluding foreign
others as diseased This study explores the multiple images of illness appearing in Toson's fiction to demonstrate that hygiene
employs more than one model of pathology and it reveals how this multiplicity functioned to produce the combinations of
exclusion and assimilation required to sustain a sense of national community Others have argued that nationalism is
inherently ambivalent and self contradictory Bourdaghs shows more concretely both how this is so and why it is necessary
and provides in the process a new way of thinking about national imagination Individual chapters take up such issues as
modern medicine and the discourses of national health ideologies of the family and its representation in modern literary
works the gendering of the canon of national literature and the multiple forms of space and time that narratives of national
history require
