Indexing and Retrieval of Non-Text Information

Diane Rasmussen Neal, 2012-10-30 The scope of this volume will encompass a collection of research papers related to indexing and retrieval of online non text information In recent years the Internet has seen an exponential increase in the number of documents placed online that are not in textual format These documents appear in a variety of contexts such as user generated content sharing websites social networking websites etc and formats including photographs videos recorded music data visualizations etc The prevalence of these contexts and data formats presents a particularly challenging task to information indexing and retrieval research due to many difficulties such as assigning suitable semantic metadata processing and extracting non textual content automatically and designing retrieval systems that speak in the native language of non text documents
