The Buried Soul How Humans Invented Death:

The Buried Soul Timothy Taylor, 2004 Do cannibals exist Is there evidence for contemporary human sacrifice What are vampires The Buried Soul charts the story of the human response to death from prehistory to the present day At some moment in human history our ancestors invented death Retracing four million years this book investigates the many ways that humans in facing death first understood what it was to be alive Their dramatic confrontation with mortality survives in early accounts of sacrifices in blindfolded bodies preserved in peat bogs and in the elaborate burials of disabled or deformed individuals among Neanderthals and the people of the Ice Age Timothy Taylor has spent his life sifting through the relics of encounters with death In The Buried Soul he gathers evidence of how the ancients saw their universe and asks how we came to have not only a sense of the afterlife but also an image of the soul After we began to speak but before we could write Taylor suggests that early humans in an astonishing conceptual leap divided the body from the spirit that animated it Rituals arose that attempted to placate tempt scapegoat destroy or contain this potentially malevolent spirit Death was seen as a form of birth that set loose not only souls but also deities Appeasing them required rites so powerful they have echoed down through the ages to make macabre new puzzles for archaeologists and forensic scientists In Taylor's radical investigation of the human soul we encounter vampirism cannibalism near death experiences modern day human sacrifice and modern mummification His search spans all of human prehistory and history through to the present and interweaves the author's own experience of the bewilderment of death

Caring for Dying People of Different Faiths Rabbi Julia Neuberger, 2018-05-08 This book is a tribute to expert nursing It should be seen as a celebration of all that is good in nursing It also sets out the path for nursing that is centred on relationships the

essence of person centred nursing is based on the quality of relationships both between nurse the client and others and also between nurses their colleagues and peers Increasingly it is a challenge for nurses to hold on to humanistic care when we practice in a world of healthcare which is performance and fiscally driven The concept of partnership and reciprocity runs through the book like a golden thread gleaming in a rich tapestry of person centred practice expressed via the perspectives of the contributors Expert practitioners working with people who have dementia have led the way in the development of person centred practice Pauline Ford Advisor in Gerontological Nursing Royal College of Nursing This book is a compendium of contemporary dementia care practice It provides knowledge that is the foundation for a clear path to successful care outcomes It clearly leaves no room for the ignorance that produced the uncertainty and inconsistency of past practices If dementia can be likened to a journey of highs and lows this book shows us how to eliminate the negatives and accentuate the positives Bob Price Director Alzheimer Education Australia

Anthropology and Religion Robert L. Winzeler, 2012-04-12 Drawing from ethnographic examples found throughout the world this revised and updated text offers an introduction to what anthropologists know or think about religion how they have studied it and how they have interpreted or explained it since the late nineteenth century Robert Winzeler's balanced consideration of classic topics basic concepts and new developments in the anthropological study of religion moves beyond cultural anthropology and ethnography to gather information from physical anthropology prehistory and archaeology Written as a sophisticated but accessible treatment of the issues *Anthropology and Religion* is a key text for upper division courses

Prehistoric Belief Mike Williams, 2011-11-08 Unlike modern people those in prehistory were adept at entering trance what we now call shamanism This gave access to alternative realms where people met and befriended entities that they thought of as spirits To the people of the past the otherworld of trance and the spirits that resided there were as real to them as anything else they encountered Until recently this otherworldly realm was closed to archaeology there was no way to reconstruct ancient thought This changed with the advent of modern neurology For the first time we can now enter the minds of those who lived thousands of years ago and begin to unravel their lives the world as they would have believed it to be In this bold and groundbreaking book Dr Williams tackles all the big subjects in archaeology the spread of humans from Africa the rise of social groups the adoption of agriculture the construction of monuments the emergence of metal and the fall of the Celtic tribes Showing that belief was central to these epic changes as well as influencing the most mundane everyday task a new understanding of our prehistoric past emerges Whilst being extensively researched a fast paced and engaging narrative makes this a page turning read Evocative vignettes supplement the text and take readers back in time to experience for themselves the sights smells and sounds of the past This is a new way to approach prehistory putting people and the beliefs that they held centre stage For without understanding people's beliefs we will never comprehend their world
