The Canadian Economy And Its Problems:

The Canadian Economy and Its Problems Muriel Armstrong, 1970 **The Canadian Economy and Its Problems.**
Instructor's Manual Donald E. (Donald Eugene) Armstrong, Muriel Armstrong, 1988 **The Canadian Economy and Its Problems [text (large Print)]** Muriel Armstrong, 1984 The Canadian Economy A. E. Safarian, 2009 An updated classic on Canada's Great Depression with insights for the current global financial crisis A History of Canadian Economic Thought Robin Neill, 1991-06-06 A History of Canadian Economic Thought investigates the relationship between the evolution of economic theory and the particular geographical and political context of that theory Theories and policies are critiqued by testing them against both the conditions to which they were applied and against competing theories Not surprisingly Canadian economics reflects a number of significant issues in Canadian history Neill argues that there were distinctive economic movements in nineteenth century Ontario and in early twentieth century Quebec but that these have been displaced by an emerging North American discourse The book includes full accounts of the work of all the major figures in Canadian economics including John Rae H A Innis and Harry Johnson **The Problem of International Investment 1937** Royal Institute of International Affairs, 2019-06-21 Originally published in 1937 this is a report by a study group of members of the Royal Institute of International Affairs and aims to fill a gap in the literature of international economics It is an attempt in the first place to analyse objectively the conditions under which long term capital may move between countries and to consider carefully the special factors in the world economy of today which tend to limit the extent to which such movements are possible or desirable Secondly the book contains a careful study of the post war history of international investments which brings together facts and figures which are inaccessible to most students and businessmen Monetary and Fiscal Thought and Policy in Canada, 1919-1939 Irving Brecher, 1957-12-15 In this careful and thorough study of a Canadian field which has been relatively untouched in recent years Dr Brecher records and comments on the development of monetary and fiscal thinking in Canada in the inter war period and its impact on public policy in the federal sphere Examining Canadian opinion about economic theory during this time the author draws on four fields of thought that of government and other public officials of businessmen such as bankers and their views on what should be done about the depression of the radical group such as those prominent in the formation of the CCF and Social Credit parties and of economists prominent in the universities Dr Brecher points out in his preface that his inquiry is rooted in the conviction that the problems associated with cyclical fluctuations remain sufficiently complex to make an understanding of the developments of the twenties and thirties an indispensable condition for effective stabilization policy He finds the twenties distinguished only in the superficial and imperfect diagnosis of and remedial suggestions for unemployment made chiefly by a relatively small handful of thinkers associated with the Progressive and United Farmers movements then emerging in the West It was the thirties which under the impact of the depression witnessed the first real stirrings of careful economic analysis in cyclical terms and of statistical

techniques for measuring the value of annual productive activity and income receipts in the Dominion The author has attempted to appraise the evolution of the Canadian policy of monetary and fiscal stabilization within the thought environment in which it was conceived and implemented and on the basis of the standards set by modern income employment theory *Canada in the World Economy* John A. Stovel,1959 In his study of Canada John A Stovel examines the changes in that country s balance of payments and balance of trade from confederation to the present day including as part of his examination historical statistical and theoretical points of view The author also reexamines critically and finds himself in sharp disagreement with Jacob Viner s classic in the field *Canada s Balance of International Indebtedness 1900 1913* which has long been considered the definitive analysis of the subject Developing in Part I an eclectic theory of international balance of payments and in Part II concentrating on the Canadian balance of trade and balance of payments in relation to economic developments preceding World War I Stovel carefully prepares the foundation for a critique of Viner s analysis of the period 1900 1913 Discussing the inadequacy of the Mill Taussig theory and its empirical verification and observing the extent to which the newer theoretical developments have afforded increased understanding Stovel criticizes Viner s statistics and the use to which they were put He delineates with telling clarity the mutual interaction of many elements in cyclical growth development as opposed to the oversimplified and inadequate causal links of the earlier theory In addition to the wealth of analysis of the earlier period the author investigates the interwar period with the postwar boom and the depression of the thirties presenting a careful analysis of the structural changes in the balance of payments during this period as well as indicating the change in Canada s relation to the United States and Great Britain The concluding section of the book deals with the period following World War II and the author indicates the possible lessons to be learned from Canada s experiences and the improvements in government policy that have taken place especially with respect to exchange rates **Canada 2023-2024** P. T. Babie,Charles J.
