The Car 2004 Car:

The Car-dependent Society Hans Jeekel, 2016-04-01 Cars are essential in modern Western societies. Some even say that our modern lifestyles would have been impossible without cars. The dependency of Western societies on our cars is a unique situation in history but does not get much attention. Car use is seen as just a normal situation. The population at large knows the risks, knows the disadvantages, experiences the advantages and keeps driving. Using data from Western Europe, this book examines three key themes: frequent car use, car dependence, and the future of passenger car mobility in societies. In conclusion, in modern Western risk societies, more attention needs to be paid to car dependence, its driving forces, its advantages, its problems, and challenges for the future.

The Economic Geography of the Car Market Bartłomiej Kołsut, Tadeusz Strykiewicz, 2022-09-26 This book provides a comprehensive analysis of long-term changes in the car market of an emerging economy with a focus on its spatial and temporal dimensions. Poland, the case study in question, represents a unique laboratory of automobile revolution during the late 20th and early 21st centuries. The volume brings to the fore several key aspects of the car market, such as car ownership, markets for new cars, import of second-hand cars, car use, electromobility, and environmental impact. Many of them are the subject of a global debate in the context of achieving sustainable development goals. Others meanwhile point to the unique nature of transformations related to the car market in Poland. Altogether, consideration of these aspects enriches the international literature with new results and findings that will broaden the field of discussion on the car market onto the emerging economies, especially those of Central and Eastern Europe. The book combines the results of quantitative and qualitative research. The former is based on a big data set of ca. 40 million vehicles, and the latter on an in-depth social survey, questionnaire interviews with more than 4,000 drivers. The discussion of the geography of automobile revolution is linked to other social, economic, and spatial phenomena and processes, e.g., urban sprawl or rural marginalisation, consumer decisions, and the evolution of quality of life and the development of individual entrepreneurship or environmental protection, as well as to transport tax and customs policies. The analysis of the dynamics of change pays particular attention to the role of critical junctures such as the collapse of the communist system, EU membership, the world financial crisis (2007–2009), and the first period of the COVID-19 pandemic (2020–2021). The book will be of interest to scholars, students, and practitioners dealing with transport research, geography of transportation, spatial economy, urban and regional planning, and sustainability studies, and for car hobbyists.
