Food Quality and

Consumer Value Monika J.A. Schröder, 2013-03-09 Consumer markets for foods and beverages in developed countries are well supplied and highly fragmented Yet the question being asked is how close retailers actually come to fulfilling their customers requirements The concept of consumer value is one of the main pillars underpinning the theory of market differentiation This book takes an interdisciplinary approach to the analysis of satisfaction in relation to the consumption of food with both food science and consumer science playing central parts It approaches food quality from both the technical and the consumer satisfaction perspectives and assesses the roles of management and regulatory tools in delivering food quality for all Each area is discussed in detail using the appropriate technical terminology but keeping the text accessible to readers from both academic traditions as well as to non specialist readers

Swindled Bee Wilson, 2020-06-16 Bad food has a history Swindled tells it Through a fascinating mixture of cultural and scientific history food politics and culinary detective work Bee Wilson uncovers the many ways swindlers have cheapened falsified and even poisoned our food throughout history In the hands of people and corporations who have prized profits above the health of consumers food and drink have been tampered with in often horrifying ways padded diluted contaminated substituted mislabeled misnamed or otherwise faked Swindled gives a panoramic view of this history from the leaded wine of the ancient Romans to today s food frauds such as fake organics and the scandal of Chinese babies being fed bogus milk powder Wilson pays special attention to nineteenth and twentieth century America and England and their roles in developing both industrial scale food adulteration and the scientific ability to combat it As Swindled reveals modern science has both helped and hindered food fraudsters increasing the sophistication of scams but also the means to detect them The big breakthrough came in Victorian England when a scientist first put food under the microscope and found that much of what was sold as genuine coffee was anything but and that you couldn t buy pure mustard in all of London Arguing that industrialization laissez faire politics and globalization have all hurt the quality of food but also that food swindlers have always been helped by consumer ignorance Swindled ultimately calls for both governments and individuals to be more vigilant In fact Wilson suggests one of our best protections is simply to reeducate ourselves about the joys of food and cooking
