Snow And Glacier Hydrology:

Snow and Glacier Hydrology P. Singh, 2001-02-28 This book provides an updated discussion of snow and glacier hydrology drawing on the results of recent investigations It serves as a source of reference at the senior undergraduate or beginning graduate level and stimulates further interest in this important part of the hydrologic cycle **Snow and Glacier Hydrology**, 1993 *Snow and Glacier Hydrology* Gordon James Young, 1993 Encyclopedia of Snow, Ice and Glaciers Vijay P. Singh, Pratap Singh, Umesh K. Haritashya, 2011-06-29 The earth's cryosphere which includes snow glaciers ice caps ice sheets ice shelves sea ice river and lake ice and permafrost contains about 75% of the earth's fresh water It exists at almost all latitudes from the tropics to the poles and plays a vital role in controlling the global climate system It also provides direct visible evidence of the effect of climate change and therefore requires proper understanding of its complex dynamics This encyclopedia mainly focuses on the various aspects of snow ice and glaciers but also covers other cryospheric branches and provides up to date information and basic concepts on relevant topics It includes alphabetically arranged and professionally written comprehensive and authoritative academic articles by well known international experts in individual fields The encyclopedia contains a broad spectrum of topics ranging from the atmospheric processes responsible for snow formation transformation of snow to ice and changes in their properties classification of ice and glaciers and their worldwide distribution glaciation and ice ages glacier dynamics glacier surface and subsurface characteristics geomorphic processes and landscape formation hydrology and sedimentary systems permafrost degradation hazards caused by cryospheric changes and trends of glacier retreat on the global scale along with the impact of climate change This book can serve as a source of reference at the undergraduate and graduate level and help to better understand snow ice and glaciers It will also be an indispensable tool containing specialized literature for geologists geographers climatologists hydrologists and water resources engineers as well as for those who are engaged in the practice of agricultural and civil engineering earth sciences environmental sciences and engineering ecosystem management and other relevant subjects **Hydrology, Water Resources and Ecology in Headwaters** Karel Kovar, 1998 Snow and Glacier Hydrology Year-book, 1987-1992, 1993 **Snow and Glacier Hydrology Section Year-book 1993**, 1995 *Climate and Hydrology of Mountain Areas* Carmen de Jong, David N. Collins, Roberto Ranzi, 2005-06-17 A comprehensive overview of interaction of the major hydrological and meteorological processes in mountain areas ie Cryosphere and Climatic Change Snow Melt and Soil Water Run off and Floods Water fluxes and Water Balance Hydro meteorological Coupling and Modelling Each section will review recent research in the field and illustrate key interactions with case studies from mountainous regions in Europe The Americas and Central Asia Workshop on Permafrost Data Rescue and Access Roger Graham Barry, J. Alan Heginbottom, Jerry Brown, 1995 *Hydrology, Glaciology, and Meteorology of Nepal* Madan Lall Shrestha, Rupak Rajbhandari, 2006 Glaciers of the Himalayas Muthukumara Mani, 2021-07-16 Melting glaciers and the loss of seasonal snow pose significant risks to the

stability of water resources in South Asia The 55 000 glaciers in the Himalaya Karakoram and Hindu Kush HKHK mountain ranges store more freshwater than any region outside of the North and South Poles Their ice reserves feed into three major river basins in South Asia the Indus Ganges and Brahmaputra that are home to 750 million people One major regional driver of the accelerating glacier melt is climate change which is altering the patterns of temperature and precipitation A second driver may be deposits of anthropogenic black carbon BC which increase the glaciers absorption of solar radiation and raise air temperatures BC is generated by human activity both inside and outside of South Asia and policy actions taken by the South Asian countries themselves may meaningfully reduce it Glaciers of the Himalayas Climate Change Black Carbon and Regional Resilience investigates the extent to which the BC reduction policies of South Asian countries may affect glacier formation and melt within the context of a changing global climate It assesses the relative impact of each source of black carbon on snow and glacier dynamics The authors simulate how BC emissions interact with projected climate scenarios They also estimate the extent to which these glacial processes affect water resources in downstream areas of these river basins and present scenarios until 2040 Their policy recommendations include the following Full implementation of current BC emissions policies can significantly reduce BC deposition in the region additional reductions can be realized by enacting and implementing new policies that are economically and technically feasible Improving the efficiency of brick kilns could be key to managing BC and modest up front investments could pay off quickly Cleaner cookstoves and cleaner fuels can help to reduce BC and improve local air quality Improving institutions for basin based water management and using price signals are essential elements of more efficient water management Careful management of hydropower and storage resources will require developers to factor in changing water flows and consider planning for large storage projects to stabilize water availability Regional cooperation and the exchange of information can be an effective transboundary solution helping countries to manage glaciers and related natural assets collaboratively New policies are needed to reverse trends like the melting of glaciers Success will require an active agile cooperation between researchers and policy makers To support an open dialogue the model developed and used in this book is an open source state of the art model that is available for others to use and improve on
