Cybernetics and Development Michael J. Apter, 2016-01-22 Cybernetics and Development deals with the ways in which growing and developing biological systems control themselves during development It is a preliminary attempt to apply some of the insights and techniques of cybernetics to the problem of understanding such development and its control The book begins with a discussion of the nature of cybernetics and its methods Separate chapters cover the use of cybernetics in the field of biological development previous work in the area of cybernetics related to automata theory and the application of information theory to development Subsequent chapters present models of development These include computer programs which continually replicate themselves and control the resulting development growing automata nets as models of development and a method that allows a system to control the relative sizes of its parts during development and afterwards during regeneration This book provides enough background material to make it understandable both to the biologist with little knowledge of cybernetics and the cybernetician with no great knowledge of developmental biology **California. Dynamic Light Scattering Bruce J. Berne, Robert Pecora, 2013-07-24 Lasers play an increasingly important role in a variety of detection techniques making inelastic light scattering a tool of growing value in the investigation of dynamic and structural problems in chemistry biology and physics Until the initial publication of this work however no monograph treated the principles behind current developments in the field This volume presents a comprehensive introduction to the principles underlying laser light scattering focusing on the time dependence of fluctuations in fluid systems it also serves as an introduction to the theory of time correlation functions with chapters on projection operator techniques in statistical mechanics The first half comprises most of the material necessary for an elementary understanding of the applications to the study of

macromolecules or comparable sized particles in fluids and to the motility of microorganisms The study of collective or many particle effects constitutes the second half including more sophisticated treatments of macromolecules in solution and most of the applications of light scattering to the study of fluids containing small molecules With its wide ranging discussions of the many applications of light scattering this text will be of interest to research chemists physicists biologists medical and fluid mechanics researchers engineers and graduate students in these areas

Dreaming of Hope Street Eder Holguin ,2013-11-19 From Living On The Street To Becoming A Successful Entrepreneur Today nearing forty Eder is a successful New York entrepreneur in the online media industry and CEO of a digital marketing company However as a kid in the mid 80s he fled a frightening home life and wound up living for years on the streets of Medellin Colombia It was a dicey existence in what was described during this era as the most dangerous place on earth where international drug lords like Pablo Escobar ruled where you could be shot for looking at the wrong guy the wrong way Dreaming of Hope Street is the story of how he went from living in the streets to become a successful entrepreneur The book is in the classic Coming of Age tradition and proves that though life can be ugly and brutal even the most disadvantaged can overcome the odds and find happiness their own Hope Street The narrative steps along and rings with authenticity it s often sad shocking but ultimately uplifting and motivational Scroll up and grab a copy today

Dutch Calvinistic Pietism in the Middle Colonies James Robert Tanis,2012-12-06 The word pietism usually conjures up a host of ambivalent impressions It has seemed to me increasingly clear that many of the strengths of pietism have been swept aside by reactions against the excesses of the movement To properly assess the structures of pietism it is important to comprehend its matrix and to understand its exponents In preparing this study therefore I have sought to recapture something of the person of Theodorus Jacobus Frelinghuysen as well as the gist of his thought something of his environment as well as the institutions of his day To achieve this I have traveled many by paths and knocked on many doors But the past has not always yielded its secrets much is lost forever Hagen in Westphalia Frelinghuysen s birthplace is now a modern city and only in a few isolated particulars is it reminiscent of Hagen in 1693 In the nearby village of Schwerte however the ancestral church of his forebears remains as it was nearly three hundred years ago The gymnasium he attended in Hamm was destroyed in the bombings of World War II though the library he used during his study at Lingen is still largely intact In the tiny East Frisian village of Loegumer Voorwerk Frelinghuysen s first parish one can still stand in the pulpit where he first preached his awakening
