## **Social Assistance In Albania:**

Social Assistance in Albania Harold Alderman, 1998-01-01 Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor. Albania Social Assistance Policy Note Melis U. Guven, 2013 Reducing poverty continues to be one of the main priorities of the Government of Albania. Currently, Albania has an ample platform to provide social protection to its citizens through social insurance, social assistance, and employment programs. However, these programs are not efficiently linked to each other, which can lead to unclear and occasionally overlapping roles among the programs. Among these social protection programs, Ndihma Ekonomike NE is the only poverty targeted social benefits program available to the Albanian Government, but despite the continued efforts of the Government to improve the program, its impact on the poverty impact of NE remains low. Against this backdrop, the objective of this note is to assist the policy makers in Albania with identifying reforms that would improve the overall effectiveness and targeting of NE. Specifically, the note will present key challenges faced by the Government as well as outline the reforms that would contribute to a more efficient and effective social assistance system in Albania, resulting in a process with improved transparency and accountability. The note is organized as follows: Section 2 presents a brief overview of the social protection system in Albania while at the same time discussing inefficiencies that arise due to lack of linkages between these programs. Section 3 assesses the current effectiveness of NE, and Section 4 concludes with recommendations. **Poverty and Exclusion in the Western Balkans** Caterina Ruggeri Laderchi, Sara Savastano, 2013-02-12 This book maps the latest developments in the policy relevant analysis on poverty inclusion and the social agenda in the Western Balkans. It does so by presenting a selection of recent papers which explore from a methodological and analytical point of view how the inclusion agenda can be monitored and adapted to understand the challenges in the region. The volume includes an overview and four sections covering respectively: 1. innovations in terms of measurement of poverty and inclusion in the region; the concept of inclusion as elaborated at the EU level; innovations in survey design to suit the measurement of inclusion; methodological insights from qualitative work; 2. innovative country level analysis: updating poverty mapping in intercensal years; the analysis of material deprivation; the analysis of determinants of social inclusion; subjective wellbeing of public work program participants; 3. examples of country level analysis of drivers of exclusion; barriers to formalization in the labour market; gender disparities in the labour market; disruption in social networks following urbanizations; attitudes towards multi ethnic states; 4. building inclusive safety nets; an assessment of safety nets in the region; the political economy of welfare reform; micro simulations of social assistance reform; the adoption of better tools to improve targeting performance. The chapters combine sophisticated techniques which are at the frontiers of poverty analysis: small area estimation; efficiency analysis applied to

household welfare micro simulations with less ground breaking papers which take advantage of innovative datasets or perspectives deeply grounded in the policy dialogue in the countries of the region By providing a wide spectrum of innovative and policy relevant analytical contributions this book will be of broader interest than for observers of the region

Income Support for the Poorest Emil Tesliuc,Lucian Pop,Margaret Grosh,Ruslan Yemtsov,2014-06-26 This study reviews the role and workings with their strengths and weaknesses of last resort income support LRIS programs in Eastern Europe and Central Asia It draws on a combination of household survey and administrative data for a large group of countries and detailed case studies for a smaller number of countries that span the spectrum of the income range in the region It thus combines the value of wide comparable multi country work with that of in depth country specific probing on key themes The experiences of LRIS programs in Eastern Europe and Central Asia have demonstrated the technical feasibility of highly efficient poverty targeted programs in the region The detailed case studies suggest how programs can improve their coverage control error and fraud and be implemented effectively in decentralized settings This experience is pertinent to other regions as well adding to the know how for poverty targeting programs in middle and low income countries Perhaps especially importantly the book shows that means testing can be accomplished in settings with sizeable informal sectors and at reasonable administrative costs The study also suggests that currently the role of last resort income support programs within the overall social protection systems of the region is often too small and that their eligibility thresholds should be revised and indexed so that the programs continue to serve a meaningful swath of the low income households in each country Moreover the programs can be used as the nexus to weave together a variety of income supports and services for low income households

Congress. Commission on Security and Cooperation in Europe, 2006 **On Eagle's Wings** Dirk J. Bezemer, 2006 This book is a contribution by a diverse group of authors from the academic business and policy advice communities to our understanding of recent social and economic developments in Albania The motivation for this book is that there are lessons of wider importance to be learnt from the fascinating story of recent Albanian developments Michael Kaser opens the book with a recounting of the country's history and political economy before and during transition He brings to the job nearly six decades of professional experience as a diplomat and academic and an intimate knowledge of Albania This chapter provides a detailed political history during transition up to late 2004 Dirk Bezemer contributes an analysis of the collapse in early 1997 of the economy and society brought about by Ponzi schemes He links the lack of productivity growth and the growth of a virtual financial sector to policy practice focusing on macro stability and state abstinence from interfering in sectoral issues policies which are still common in many transition and developing economies Albania has implemented tight monetary policy stabilised the exchange rate implemented prudent fiscal policies and achieved a significant reduction in domestic borrowing all contributing to the decline of the overall deficit Based on his expertise as an IMF analyst Treichel discusses Albania's macroeconomic prospects Nevila Konica documents the large Albanian emigration flows during transition leading to an estimated ten percent of the population working outside Albanian territory Based on her large primary survey data set she explores personal attributes that characterise emigrants as well as the extent of the brain drain She finds that remittances from emigration have been vitally important to Albania's economy by contributing to household incomes and reducing domestic unemployment Klarita Gerxhani delves deeper into the nature of the informal economy and presents key insights from her original academic research based on fieldwork in Tirana In her study of the street vending sector she traces its emergence to clear push and pull factors emigration issue in the broader context of labour market developments They analyse the large regional differences in unemployment rate the large share of long term unemployment and the persistently higher than average unemployment rate and falling participation rate for women They also conclude that emigration reduced the pressure of unemployment in the labour market and on the government's budget and contributed to financing imports consumption and investments through remittances Gloria La Cava uses her research experience as World Bank Senior Social Scientist specialising in the region to address jointly with co author Rafaella Nanetti the changing socio economic conditions that Albanians face They focus on the nature of people's vulnerability resulting from a loss of social support during the transformation years and on social programs addressing new needs World Bank analyst Malcolm Childress discusses the unfinished business of land and property reform in Albania emergence of a dynamic land market and the sustained supply response which was expected Urban property privatisation has fostered a construction

boom in Tirana and along the coast and the creation of large areas of informal settlement on the outskirts of Tirana and Durres Childress provides an insightful discussion of possible consequences In the final chapter on agriculture Pasquale Pazienza highlight key problems of land fragmentation and under investment particularly in the irrigation system illuminating the current situation with the post war history of agricultural and land reforms He explores the determinants of productivity in a production function framework taking a long term view and draws out implication for what is still the largest sector in Albania s economy

**Eastern Europe and the Former Soviet Union** David Tobis,2000 One of the most harmful costly and intractable legacies of the command economies of Central and Eastern Europe and the former Soviet Union is the reliance on residential institutions for the care of children the elderly and the people with disabilities As a result there are almost no community based alternatives to care for large and growing numbers of vulnerable individuals Other industrial nations have experienced similar periods of economic and social upheaval and also relied on residential institutions to care for vulnerable and marginalized groups However most of these nations have switched from residential care to community based social services The question for the countries of Central and Eastern Europe and the former Soviet Union is how they can make the same transition Moving from Residential Institutions to Community Based Social Services in Central and Eastern Europe and the Former Soviet Union examines the use of residential institutions for vulnerable groups past and present and proposes strategies for the future The study focuses on five countries Albania Armenia Latvia Lithuania and Romania where the World Bank is helping develop community based social services to reduce the reliance on residential institutions Making
