Social Change and the Life Course Matilda White Riley, 1988 **Social Dynamics of the Life Course** Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina Social Change and the Life Course: Sociological lives American Sociological Association. Sourcebook of Family Theories and Methods Pauline Boss,William J. Doherty,Ralph LaRossa,Walter R. Schumm,Suzanne K. Steinmetz,1993-03-31 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project *The Handbook of Marriage and the Family* edited by Harold Christensen and published in 1964 the two *Contemporary Theories about the Family* volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the *Handbook of Marriage and the Family* edited by Marvin Sussman and Suzanne Steinmetz then in production
