forces that have transformed consumption patterns and led to the fragmentation of wine drinking culture The aim of this book is to provide an original account of the various causes of the long term decline in alcohol consumption and of the emergence of a new wine drinking culture since the 1970s and to analyse its relationship to national and regional identity

Valuing the Unique Lucien Karpik,2021-11-09 In this landmark work of economic sociology Lucien Karpik introduces the theory and practical tools needed to analyze markets for singularities Singularities are goods and services that cannot be studied by standard methods because they are multidimensional incommensurable and of uncertain quality Examples include movies novels music artwork fine wine lawyers and doctors Valuing the Unique provides a theoretical framework to explain this important class of products and markets that for so long have eluded neoclassical economics With this innovative theory called the economics of singularities Karpik shows that because of the uncertainty and the highly subjective valuation of singularities these markets are necessarily equipped with what he calls judgment devices such as labels brands guides critics and rankings which provide consumers with the credible knowledge needed to make reasonable choices He explains why these markets are characterized by the primacy of competition by qualities over competition by prices and he identifies the conditions under which singularities are constructed or are in danger of losing their uniqueness After demonstrating how combinations of the numerous and multiform judgment devices can be used to identify different market models Karpik applies his analytical tools to the functioning of a large number of actual markets including fine wines movies luxury goods pop music and legal services
