Ferrara,1995 Information on more than 17 500 living authors from English speaking countries The Bookseller ,1975 **Contemporary Authors, New Revision Series** CONTEMPORARY.,1981 *Bookseller* ,1972 Vols for 1871 76 1913 14 include an extra number The Christmas bookseller separately paged and not included in the consecutive numbering of the regular series *Encyclopedia of Media and Propaganda in Wartime America* Martin J. Manning,Clarence R. Wyatt,2010-12-20 This fascinating compilation of reference entries documents the unique relationship between mass media propaganda and the U S military a relationship that began in the period before the American Revolution and continues to this day sometimes cooperative sometimes combative and always complex The Encyclopedia of Media and Propaganda in Wartime America brings together a group of distinguished scholars to explore how war has been reported and interpreted by the media in the United States and what effects those reports and interpretations have had on the people at home and on the battlefield Covering press U S military relationships from the early North American colonial wars to the present wars in Iraq and Afghanistan this two volume encyclopedia focuses on the ways in which government and military leaders have used the media to support their actions and the ways in which the media has been used by other forces with different views and agendas The volumes highlight major events and important military political and cultural players offering fresh perspectives on all of America s conflicts Bringing these wars together in one source allows readers to see how media affected the conflicts individually but also understand how the use of the various forms of media print radio television film and electronic have developed and changed over the years **The American and English Encyclopedia of Law and Practice** William Mark McKinney,David Shephard Garland,1909 *The Fourth Source* Robert J. Tuttle,2012 This book describes how the effects of nature s own nuclear reactors have shaped the Earth the Solar System the Universe and the history of life as we know it It focuses on observed effects that are poorly explained by our standard theories identifies certain errors in those theories and shows how these effects are caused by natural nuclear fission reactors The theory of Plate Tectonics is wrong and it is shown that expansion of the Earth causes continental drift A physically reasonable mechanism is proposed for expansion and observational data are presented to show that this occurs Evolution is explained as punctuated equilibrium with mutations caused by abrupt surges of radiation and related life forms that have been interpreted as separate species are actually the result of radiation injury

This view is particularly effective as applied to humans The ability of the dinosaurs to live so large is explained by use of Earth Expansion and a more massive atmosphere to provide buoyancy and effective transpiration of oxygen These effects also explain how pterodactyls and ancient birds could fly Expansion induced by impacts at the end of the Cretaceous caused the atmosphere to thin and the dinosaurs collapsed Analysis of geological and biological data supports this The astronomical distance scale is shown to be wrong based on the misconception that trigonometric parallax is an absolute measurement It isn't and the method is led astray by the overwhelming number of asteroidal fragments masquerading as stars The measurements of an expanding Universe are shown to be in error and an expanding Universe is not needed by an alternative interpretation of Einstein's equations This interpretation is based on the equal creation of matter and antimatter which is known to occur Spiral galaxies are not vast Island Universes of stars as we have thought but are shown to be the strewn fields of debris from the nuclear fission detonation of distant planets The Universe is not made up of 96% Dark Matter and Dark Energy but is instead very ordinary Abundant evidence and references provide support for all these interpretations This book opens new opportunities for research by correcting several fundamental errors in our concepts of the Earth Life and the Universe *Publishers Weekly* ,1976
