Visual Language Theory Kim Marriott,Bernd Meyer,2012-12-06 Kim Marriott Bernd Meyer Communication is one of the hallmarks of humans When we think of hu man communication most people first think of spoken and written lan guages These are similar in that symbols in the language are encountered and processed sequentially either temporally as they are spoken or as char acters are read across a page However not all human communication is sequential in nature Important components of human communication are visual languages such as maps or diagrams In these languages the basic symbols are not encountered sequentially but rather seen together at a glance Visual languages are ubiquitous in human cultures ranging from tradi tional paintings of central Australian aborigines which are in part maps of the countryside to an architect s design of a new building Visual languages have been employed from earliest pre history to the present and are used in almost every human endeavor They cover the entire spectrum of human expression ranging from fine art such as an abstract expressionist s private language to precise technical communication using rigorously defined no tation such as musical notation mathematical notation or street maps Some visual languages such as sign languages used by the deaf community substitute spoken language entirely Indeed sign languages for example American Sign Language are a particularly interesting instance of visual communication since they use three dimensional spatial arrangements of signs in combination with their sequential temporal order to constitute meaning **Happy Dog Sizzles!** Lisa Grubb,2004 It s summertime and it s HOT The pool is packed There s hardly room for a shrimp much less Happy Dog and Jack Cat What can these two friends do to cool off Take matters into their own hands that s what A little bit of junk here a little bit of imagination there and watch out It s walla pa doo time Full of the bright bold paintings for which Lisa Grubb is loved worldwide this fun follow up to Happy Dog will leave young readers eager to craft their own inventions and parents smiling at the results *Accounting: A*
