The Harmon Memorial Lectures In Military History 1959 1987:

The Harmon Memorial Lectures in Military History, 1959-1987 Harry R. Borowski, 2001 Military history is no longer a compartmentalized area of study with a myopic focus on battlefield tactics and outcomes that pays little heed to societal influences The new military history born in the 1960s recognizes that military history is as much a product of social factors such as politics and economics as a shaping influence on society Lt Gen Hubert R Harmon first superintendent of the U S Air Force Academy was a strong advocate of the study of military history to both understand the world we live in and to shape its destiny As a tribute to his distinguished career the Academy started a military history lecture series named after him in 1959 This volume consolidates all the Harmon Lectures through 1987 grouping them by theme The lectures cover a wide range of topics and eras from revolutionary America and Tsarist Russia to contemporary problems in twentieth century warfare and U S Air Force doctrine

The Harmon Memorial Lectures in Military History, 1959-1987: A Collection of the First Thirty Harmon Lectures Given at the United States Air Force Academy United States. Air Force. Office of Air Force History, 1989

The Harmon Memorial Lectures in Military History, 1959-1987 Office of Air Force History, U.S. Air Force, 2015-03-02 In 1959 the United States Air Force Academy's Department of History began the Harmon Memorial Lecture Series on Military History in memory of Lt Gen Hubert R Harmon first superintendent and father of the Academy The series supported two goals to further encourage the awakened interest in military history that evolved after World War II and to stimulate cadets to develop a lifelong interest in the history of the military profession Each year thereafter a committee of nationally known civilian historians and Academy representatives selected an outstanding military historian to be the annual lecturer Beginning in 1970 the Harmon Lecture also served as the keynote address for the Academy's biennial Military History Symposium This collection of the first thirty Harmon Memorial Lectures reflects the evolution in scholarship of prominent scholars working in military history over the past three decades In keeping with the purpose of the series the Academy publishes and distributes each lecture to Air Force and Department of Defense agencies university libraries and scholars throughout the United States and abroad A number of lectures are used in courses at the Academy and we receive many requests for them from civilian scholars and military personnel Consequently the Academy's Department of History and the Office of Air Force History have decided to publish the first thirty lectures under one cover thereby making them more available In this way we continue to honor the memory of General Harmon who during his lifetime developed a deep and abiding interest in military history and contributed so much to establishing the United States Air Force Academy

Harmon Memorial Lectures in Military History, 1959-1987 Harry R. Borowski (Ed), 1988 [Harmon Memorial Lectures in Military History 1959-1987](#) Harry R. Borowski, 1989-04-01 [Harmon Lectures](#), 1988-01-01 *Harmon Memorial Lectures in Military History, 1959-1987* Harry R. Borowski (Ed), 1988 [Air University Library Index to Military Periodicals](#), 1990 **The Cold War** Jeremy Black, 2015-10-29 The term the Cold War has had many meanings and

interpretations since it was originally coined and has been used to analyse everything from comics to pro natalist policies and science fiction to gender politics This range has great value but also poses problems notably by diluting the focus on war of a certain type and by exacerbating a lack of precision in definition and analysis The Cold War A Military History is the first survey of the period to focus on the diplomatic and military confrontation and conflict Jeremy Black begins his overview in 1917 and covers the long Cold War from the 7th November Revolution to the ongoing repercussions and reverberations of the conflict today The book is forward looking as well as retrospective not least in encouraging us to reflect on how much the character of the present world owes to the Cold War The result is a detailed survey that will be invaluable to students and scholars of military and international history

Allies in Conflict S. Weiss,1996-11-26 The following study is primarily concerned with the unifying and destructive forces that affected the Anglo American relationship between 1938 and 1944 as those involved searched for a strategic solution to the war in Europe President Franklin D Roosevelt and Prime Minister Winston Churchill s methods of leadership are compared and their personal relationship investigated Anglo American tensions are disclosed and assessed with regard to clandestine warfare special operations and rearming the French and operation ANVIL the invasion of southern France is examined for its role in the Anglo American strategic conflict

Korean War, 1950-1953 ,1990

Airmen and air theory a review of the sources Phillip S. Meilinger,2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done

Making Makers Michael P. M. Finch,2024 Making Makers presents a comprehensive history of a seminal work of scholarship in war and strategy Makers of Modern Strategy a volume which was made and re made across the twentieth century Here we learn the stories of the scholars who were central to these efforts building a nuanced appraisal of the development of scholarship on war

War Machines Timothy Moy,2016-03-01 The American military establishment is intimately tied to its technology although the nature of those ties has varied enormously from service to service The air force evokes images of pilots operating hightech weapons systems striking precisely from out of the blue to lay waste to enemy installations The fundamental icon for the Marine Corps is a wave of riflemen hitting the beaches from rugged landing craft and slogging their way ashore under enemy fire How did

these very different relationships with technology develop During the interwar years from 1920 to 1940 leaders from the Army Air Corps and the Marine Corps recreated their agencies based on visions of new military technologies In *War Machines* Timothy Moy examines these recreations and explores how factors such as bureaucratic pressure institutional culture and America's technological enthusiasm shaped these leaders' choices The very existence of the Army Air Corps was based on a new technology the airplane As the Air Corps was forced to compete for money and other resources during the years after World War I Air Corps leaders carved out a military niche based on hightech precision bombing The Marine Corps focused on amphibious firstwave assault using sturdy graceless and easy to produce landing craft Moy's astute analysis makes it clear that studying the processes that shaped the Army Air Corps and Marine Corps is fundamental to our understanding of technology and the military at the beginning of the twentyfirst century **War Studies Reader** Gary Sheffield, 2010-07-01 This reader provides authoritative and thought provoking pieces of War Studies scholarship in an accessible form Covering a wide spectrum of topics including strategy Colin S Gray *Shell Shock and the Cultural History of the Great War* Jay Winter and Coalition Warfare Holger H Herwig this book purposefully ranges across military history international relations and contemporary security to capture the multidisciplinary nature of the subject Gary Sheffield also provides an introduction to the Reader and to War Studies explaining the growth and development of this dynamic field of study **Monthly Catalog of United States Government Publications**, 2004-08 *Fast Tanks and Heavy Bombers* David E. Johnson, 2013-01-14 The U S Army entered World War II unprepared In addition lacking Germany's blitzkrieg approach of coordinated armor and air power the army was organized to fight two wars one on the ground and one in the air Previous commentators have blamed Congressional funding and public apathy for the army's unprepared state David E Johnson believes instead that the principal causes were internal army culture and bureaucracy and their combined impact on the development of weapons and doctrine Johnson examines the U S Army's innovations for both armor and aviation between the world wars arguing that the tank became a captive of the conservative infantry and cavalry branches while the airplane's development was channeled by air power insurgents bent on creating an independent air force He maintains that as a consequence the tank's potential was hindered by the traditional arms while air power advocates focused mainly on proving the decisiveness of strategic bombing neglecting the mission of tactical support for ground troops Minimal interaction between ground and air officers resulted in insufficient cooperation between armored forces and air forces *Fast Tanks and Heavy Bombers* makes a major contribution to a new understanding of both the creation of the modern U S Army and the Army's performance in World War II The book also provides important insights for future military innovation **Military Review**, 2006 *MacArthur's Airman* Thomas E. Griffith, Jr., 2017-01-20 A fighter pilot who flew 75 combat missions in World War I George C Kenney was a charismatic leader who established himself as an innovative advocate of air power As General MacArthur's air commander in the Southwest Pacific during World War II Kenney played a pivotal role in the conduct of the war but until now his performance

has remained largely unexplored Thomas Griffith offers a critical assessment of Kenney's numerous contributions to MacArthur's war efforts He depicts Kenney as a staunch proponent of airpower's ability to shape the outcome of military engagements and a commander who shared MacArthur's strategic vision He tells how Kenney played a key role in campaigns from New Guinea to the Philippines adapted aircraft pilots doctrine and technology to the demands of aerial warfare in the southwest Pacific and pursued daring strategies that likely would have failed in the European theater Kenney is shown to have been an operational and organizational innovator who was willing to scrap doctrine when the situation called for ingenuity such as shifting to low level attacks for more effective bombing raids Griffith tells how Kenney established air superiority in every engagement provided close air support for troops by bombing enemy supply lines attacked and destroyed Japanese supply ships and carried out rapid deployment by airlifting troops and supplies Griffith draws on Kenney's diary and correspondence the personal papers of other officers and previously untapped sources to present a comprehensive portrayal of both the officer and the man He illuminates Kenney's relationship with MacArthur General Hap Arnold and other field commanders and closely examines factors in air warfare often neglected in other accounts such as intelligence training and logistical support MacArthur's Airman is a rich and insightful study that shows how air ground and marine efforts were integrated to achieve major strategic objectives It firmly establishes the importance of MacArthur's campaign in New Guinea and reveals Kenney's instrumental role in turning the tide against the Japanese *Quarterly Review of Military Literature*
