The Health Crisis Opposing Viewpoints Opposing Viewpoints Ser:

The Health Crisis Bonnie Szumski, 1989 AIDS health care for the elderly and medical costs are only 3 of the many topics explored from differing points of view **Books in Print Supplement** ,1988 **Books in Print** ,1994 **Conflicts of Conscience in Health Care** Holly Fernandez Lynch, 2010-08-13 A balanced proposal that protects both a patient's access to care and a physician's ability to refuse to provide certain services for reasons of conscience Physicians in the United States who refuse to perform a variety of legally permissible medical services because of their own moral objections are often protected by conscience clauses These laws on the books in nearly every state since the legalization of abortion by *Roe v Wade* shield physicians and other health professionals from such potential consequences of refusal as liability and dismissal While some praise conscience clauses as protecting important freedoms opponents concerned with patient access to care argue that professional refusals should be tolerated only when they are based on valid medical grounds In *Conflicts of Conscience in Health Care* Holly Fernandez Lynch finds a way around the polarizing rhetoric associated with this issue by proposing a compromise that protects both a patient's access to care and a physician's ability to refuse This focus on compromise is crucial as new uses of medical technology expand the controversy beyond abortion and contraception to reach an increasing number of doctors and patients Lynch argues that doctor patient matching on the basis of personal moral values would eliminate or at least minimize many conflicts of conscience and suggests that state licensing boards facilitate this goal Licensing boards would be responsible for balancing the interests of doctors and patients by ensuring a sufficient number of willing physicians such that no physician's refusal leaves a patient entirely without access to desired medical services This proposed solution Lynch argues accommodates patients freedoms while leaving important room in the profession for individuals who find some of the capabilities of medical technology to be ethically objectionable **Federal Communications Commission Reports. V. 1-45, 1934/35-1962/64; 2d Ser., V. 1- July 17/Dec. 27, 1965-.** United States.
