Content Analysis of Verbal Behavior Louis A. Gottschalk, Fernando Lolas, Linda L. Viney, 2012-12-06 The psychological states of patients with diabetes mellitus were compared with those of patients suffering from other chronic diseases and people with no diagnosed chronic diseases These states were assessed by applying content analysis scales to transcripts of their descriptions of their current experiences Analyses of the diabetics scale scores revealed a pattern characterized by much anxiety depression anger expressed both directly and indirectly together with feelings of helplessness The sources of anxiety which proved to be of most importance to them were fears of death and bodily mutilation as well as guilt and shame They experienced little sense of sharing with most people around them although they showed considerable enjoyment of close relationships with family and friends This pattern of psychological states did not vary with the sex of the patients or whether they were interviewed in a hospital or at home nor with recency of onset or multiplicity of health problems It was similar to the pattern of patients with other chronic diseases but differed significantly from that of the healthy group Acknowledgment The authors wish to acknowledge the contribution of Carol Preston to the collection and analysis of these data which were made available in part by patients of the Wollongong Hospital and members of the Illawarra Branch of the Diabetic Association of New South Wales References 1 Strong JA Baird JD 1971 Diseases of the endocrine system In Davidson S McLeod J eds The principles and practice of medicine *Psychopharmacology Bulletin*, 1979 *Emotional Expression* G. Collier, Gary James Collier, 2014-01-14 First published in 1985 The purpose of this book is to draw together research on one aspect of verbal and nonverbal communication emotional expression The focus is on verbal and nonverbal behaviors associated with emotions A distinction is made between expressive behaviors that occur spontaneously during emotions often without a person's awareness or control and more deliberate forms of communication where the person manipulates verbal and nonverbal cues in order to create an impression The difference between expression and communication is introduced in Chapter 1 and developed throughout the book A Modern Theory of "Language" Daniel E.
