The Medias Taboo A Treatise On World Population:

Feeding Frenzy Paul McMahon, 2014-06-07 *Feeding Frenzy* traces the history of the global food system and reveals the underlying causes of recent turmoil in food markets. Supplies are running short, prices keep spiking, and the media is full of talk of a world food crisis. The turmoil has unleashed some dangerous forces. Food-producing countries are banning exports even if this means starving their neighbors. Governments and corporations are scrambling to secure control of food supply chains. Powerful groups from the Middle East and Asia are acquiring farmland in poor countries to grow food for export, what some call land grabs. This raises some big questions: Can we continue to feed a burgeoning population? Are we running out of land and water? Can we rely on free markets to provide? This book reveals trends that could lead to more hunger and conflict. But Paul McMahon also outlines actions that can be taken to shape a sustainable and just food system. **Meltdown :**

Topical Corticosteroids in Dermatology Koushik Lahiri, 2017-08-11. This treatise aims to fill up the lacuna and to contribute significantly to the dissemination of knowledge about the indication, contraindication, mechanism of action, ethical use, side effects, and various other facets related to topical corticosteroids. Topical corticosteroids (TC) have greatly enhanced dermatologists' ability to effectively treat several difficult dermatoses. The available range of formulations and potencies allows them to flexibly treat all groups of patients, different phases of disease, and different anatomic sites. Improper, incomplete knowledge about topical corticosteroids, mechanism of action, indications, classifications, and contraindications has produced a rapid rise in the incidence of improper use of these drugs, which could potentially bring disrepute to this entire group of amazing drugs. Responsibility for disseminating proper knowledge regarding when, where, and how to use TC, both to internists and patients, primarily rests with dermatologists. In this regard, the benefits of rational and ethical use and the potential harm of overuse and misuse for nonmedical, especially cosmetic purposes, should be clearly conveyed before prescribing TC. **The Palgrave Encyclopedia of Global Security Studies**, 2023-02-15.
