Militarized Landscapes Chris Pearson, Peter Coates, Tim Cole, 2010-06-03 The black smoke billowing from burning oil wells during the Gulf War of 1990 91 directed media and public attention towards war's devastating environmental impact Yet even before the first bomb is dropped preparation for warfare materially and imaginatively reshapes rural landscapes and environments This volume is the first to explore the comparative histories and geographies of militarized landscapes Moving beyond the narrow definition of militarized landscapes as theatres of war it treats them as simultaneously material and cultural sites that have been partially or fully mobilized to achieve military aims Ranging from the Korean DMZ to nuclear testing sites in the American West and from Gettysburg to Salisbury Plain *Militarized Landscapes* focuses on these often secretive hidden dangerous and invariably controversial sites that occupy huge swathes of national territories

Rethinking Leviathan John Brewer, Eckhart Hellmuth, 1999 *Rethinking Leviathan* offers a new approach to the history of the modern state It concentrates on the eighteenth century and on two cases those of Britain and Germany These two countries have always been test cases for historians and social scientists looking at the development of the modern state because they have been seen as presenting the two main alternatives in the state building process Using a comparative study of the British and German states including Prussia it deconstructs certain clichés about them and forces us to rethink how to study states in the early modern era The volume is less concerned with the theory of the state or the formal constitutional conditions under which governments operate than with their actual *modus operandi* The subjects covered in this volume include some which have so far been ignored in reconstructing the history of the modern state

Mobilizing nature Chris Pearson, 2017-10-03 Mobilizing nature traces the environmental history of war and militarisation in France from the creation of Châlons Camp in 1857 to military environmentalist policies in the twentieth century It offers a fresh perspective on the well known histories of the Franco Prussian War Western Front 1914-18 Second World War Cold War and the anti base campaign at Larzac whilst uncovering the largely hidden history of the numerous military bases and other installations that pepper the French countryside Mobilising nature argues that the history of war and militarisation can only be fully understood if human and environmental histories are considered in tandem Preparing for and conducting wars were only made possible through the active manipulation and mobilisation of topographies climatic conditions vegetation and animals But the military has not monopolised the mobilisation of nature Protesters against militarisation have consistently drawn on images of peaceful and productive civilian environments as the preferable alternative to destructive tanks and bombs Written in an accessible style Mobilizing nature will appeal to readers interested in modern France environmental history military geographies and histories anti military protests and environmentalism
