The Mind Behind The Eye:

The Eye and the Mind C. Landesman, 2013-06-29 This book is a discussion of some of the major philosophical problems centering around the topic of sense perception and the foundations of human knowledge It begins with a characterization of our common sense understanding of the role of the senses in the acquisition of belief and it argues that scientific accounts of the processes of perception undermine salient parts of this understanding The naive point of view of direct realism cannot be sustained in the light of a scientifically instructed understanding of perception This critique of direct realism points to the correctness of the representative theory of perception characteristic of such early modern philosophers as Descartes and Locke and it also endorses the subjective turn that they defended It argues that these positions do not require introducing sense data into the picture and thus it avoids the intractable problems that the sense datum philosophy introduces In addition several versions of cognitive accounts of sense perception are criticized with the result that it is unnecessary to characterize sensory processes in intentional terms The book then turns to a leading question introduced into modern philosophy by Descartes and Locke the question of the accuracy of the information delivered by the senses to our faculty of belief In particular how accurate are our representations of the secondary qualities The case of color is considered in detail

The Passive Eye Branka Arsić, 2003 The Passive Eye is a revolutionary and historically rich account of Berkeley's theory of vision In this formidable work the author considers the theory of the embodied subject and its passions in light of a highly dynamic conception of infinity Arsić shows the profound affinities between Berkeley and Spinoza and offers a highly textual reading of Berkeley on the concept of an exhausted subjectivity The author begins by following the Renaissance universe of vision particularly the paradoxical elusive nature of mirrors then shows how this conception of vision was translated into the optical devices and in what way the various ways of deception could be conceived Reading Berkeley against the backdrop of competing theories in relation to Leibniz Spinoza Newton Malebranche Hume Locke Molyneux and others this book gives a meticulous historic reconstruction of Berkeley's theory This excellent scholarly work presents Berkeley's theory in a new and radical light The book presented in three parts begins by presenting the conceptions of vision prior to Berkeley's intervention In the second part the author moves through a careful study of Descartes theory of vision to arrive at Berkeley The third part addresses the author's version of Berkeley in which the eye and the image become inseparable due to the collapse of the universe of representation The problem of vision becomes not that of representation but of presentation Through an erudite historic reading of Berkeley's theory and astute comparative assessments the author uncovers Berkeley's place as a contemporary theoretician corresponding with such thinkers as Deleuze Lacan Foucault and Derrida

The Mind's Eye Alan Krohn, 2025-09-01 Set during the short dark days of a Michigan winter in the mid 90's the story takes us into the mind of Dr Ivan Weiss a gifted but troubled psychoanalyst Weiss's life is disintegrating His daughter was recently raped worries about his wife's fidelity which had plagued him in the past are resurfacing and the clinic he directs is facing a sexual harassment charge When his wife disappears leaving an enigmatic note and his daughter goes missing his world totally flies apart The story ranges from the quiet of a psychoanalytic consulting room in Ann Arbor to the south of France to a police chase in the devastated areas of downtown Detroit many years before its recent rebirth It is about the present and the secrets from the past The Mind's Eye allows the reader even if unfamiliar with psychoanalysis to see how an analyst works and thinks in the challenging humanistic effort to relieve psychic torment through understanding It is a powerful experience you will not soon forget I strongly recommend it to all students of

the human condition It has the initial appearance of a compelling mystery story but as the story develops the reader discovers that it is really about deep universal human issues which are at the heart of all enduring literature It is about the lives and passions of several psychoanalysts their families and their patients in a Midwest college town I eagerly await his next novel Marvin Margolis M D Ph D Past President of the American Psychoanalytic Association The Mind's Eye
