The Divine Pedigree of Man Thomson Jay Hudson,1904 In attempting to fulfil a task so important and from a layman s point of view so difficult as that of outlining a scientific basis of Christian theism I feel it to be due to my readers that I should state the causes which led me to undertake it and the principles by which I have been guided in carrying it to a conclusion It is scarcely necessary to remark that this book was not written for the benefit of those who have already found in Holy Writ sufficient evidence to convince them of the existence of an intelligent Great First Cause Nor was it written to convince anybody of the soundness of the theory of organic evolution Preface PsycINFO Database Record c 2010 APA all rights reserved *The Portal of Evolution* Fellow of the Geological and Zoological Societies,1918 *The Anatomy of Human Destructiveness* Erich Fromm,2013-02-26 A study of aggression from the renowned social psychologist and New York Times bestselling author of *The Art of Loving* and *Escape from Freedom* Throughout history humans have shown an incredible talent for destruction as well as creation Aggression has driven us to great heights and brutal lows In *The Anatomy of Human Destructiveness* renowned social psychologist Erich Fromm discusses the differences between forms of aggression typical for animals and two very specific forms of destructiveness that can only be found in human beings sadism and necrophilic destructiveness His case studies span zoo animals necrophiliacs and the psychobiographies of notorious figures such as Adolf Hitler and Joseph Stalin Through his broad scholarship Fromm offers a comprehensive exploration of the human impulse for violence This ebook features an illustrated biography of Erich Fromm including rare images and never before seen documents from the author s estate

Man and His Ancestor Charles Morris,1900 **Ancient Pakistan - An Archaeological History** Mukhtar Ahmed,2014-05-29 *Ancient Pakistan An Archaeological History* deals with the prehistory of Pakistan from the Stone Age to the end of the Indus Civilization This particular volume *The Stone Age* concerns with the first appearance of man in northern Pakistan more than a million years ago and traces his cultural history up to the emergence of agriculture and sedentary living in this region The book is written for students of ancient history anthropology and archaeology The material is generously illustrated with a large number of maps tables drawings and colored photographs Each Section is provided with extensive references to the text and a comprehensive bibliography is provided for those who want to dig deeper into the subject Although the book primarily deals with the Greater Indus Valley its scope is much wider the subject has been discussed in context with the paleolithic of India Central Asia and Iran The story of human evolution provides a constant background *Scars of Evolution* Elaine Morgan,2012-04-01 In this lively and controversial

book Elaine Morgan presents a challenging interpretation to the question of human evolution With brilliant logic she argues that our hominid ancestors began to evolve in response to an aquatic environment Millions of years ago something happened that caused our ancestors to walk on two legs to lose their fur to develop larger brains and learn how to speak Elaine Morgan discovers what this event was by studying the many incongruous flaws in the physiological make up of humans The human body is liable to suffer from obesity lower back pain and acne In support of her aquatic ape hypothesis she points out the flaws in our physiological make up the difficulties of erect bipedalism our hairlessness and fat layers our preference for face to face sex and the way we breathe Are these flaws a record of the history of the species the scars of evolution that are clues to earlier stages of evolution Morgan establishes the origins of the evolutionary path that separated humans from other animals and questions the theories currently accepted by science Did our ancestors adapt to an aquatic environment that subsequently dried out Elaine Morgan has made the Aquatic Ape Hypothesis a plausible alternative to conventional theories of evolution and in *The Scars of Evolution* she brings a real understanding of who humans are and where they came from

James Tucker,2005-07-01 Very few of the titles whether fiction or non take a serious analytical look at the Bible as a biblical scholar or theologian would This is where God s Inferno differs from the majority It utilizes logical rational reasoning to analyze what that Bible actually says not what most have been lead to believe It seriously attacks the present Christian faith as their tenants and doctrines are based on a very faulty interpretation of what the Bible actually says It maintains and proves the god of the Old Testament is not the Supreme God but merely what the Jewish people of Israel pictured their god to be Naturally if he is not the Supreme God then Jesus is not the Son of that Supreme God but may have been the son of that hateful murderous vengeful god of the Old Testament From the founding of Christianity it traces its impact through the first 1500 1600 years of the Catholic Church the keepers of the faith during that time It documents the Crusades the Inquisitions and the Reformation as well as the many married priests Popes who fathered children and under aged leading fathers of the Church Finally it attempts to motivate the indifferent Christian to utilize his God given mind to seriously think about what they actually believe and to conduct their lives according to that belief **The Teaching of History** Charles Hooper

Jarvis,1917 **Man Before Metals** Nicolas Joly,2025-10-06 Reprint of the original first published in 1883 The Antigonus publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage
