The Hazards Of Doing A PhD:

The Hazards of Doing a PhD Alison L. Booth, Stephen E. Satchell, 1993 **A Hazard Model of the Probability of Medical School Dropout in the United Kingdom** Wiji Arulampalam, Robin A. Naylor, Jeremy P. Smith, 2001 **Emerging Voices in Natural Hazards Research** Fernando I. Rivera, 2019-06-07

Emerging Voices in Natural Hazards Research provides a synthesis of the most pressing issues in natural hazards research by new professionals. The book begins with an overview of emerging research on natural hazards such as hurricanes, earthquakes, floods, wildfires, sea level rise, global warming, climate change, and tornadoes among others. Remaining sections include topics such as socially vulnerable populations and the cycles of emergency management. Emerging Voices in Natural Hazards Research is intended to serve as a consolidated resource for academics, students, and researchers to learn about the most pressing issues in natural hazard research today. Provides a platform for readers to keep up to date with the interdisciplinary research that new professionals are producing. Covers the multidisciplinary perspectives of the hazards and disasters field. Includes international perspectives from new professionals around the world, including developing countries.

Global Perspectives on Risk Management and Accounting in the Public Sector Ferreira, Augusta da Conceição Santos, 2016-01-18

The effects of recent economic and financial crises have reached an international scale; a number of different nations have experienced the fallout of these events, calling into question issues of accountability and reform in public management. Global Perspectives on Risk Management and Accounting in the Public Sector is a pivotal reference source for the latest research on current developments and future directions of the regulation, financial management, and sustainability of public institutions. Featuring discussions on risk assessment, transparency, and information disclosure, this book is ideally designed for regulatory authorities, researchers, managers, and professionals working in the public domain.

Treatise on Geomorphology, 2013-02-27

The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline. The number of peer-reviewed papers published in geomorphic journals has grown steadily for more than two decades, and more importantly, the diversity of authors with respect to geographic location and disciplinary background (geography, geology, ecology, civil engineering, computer science, geographic information science, and others) has expanded dramatically. As more good minds are drawn to geomorphology and the breadth of the peer-reviewed literature grows, an effective summary of contemporary geomorphic knowledge becomes increasingly difficult. The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work, and professionals seeking a concise summary of a particular topic. Information on the historical development of diverse topics within geomorphology provides context for ongoing research, discussion of research strategies, equipment and field methods, laboratory experiments, and numerical simulations reflect the multiple approaches to understanding Earth's surfaces and summaries of outstanding

research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned

Volcanic Geology of São Miguel Island (Azores Archipelago) J.L. Gaspar, J.E. Guest, A.M. Duncan, F.J.A.S. Barriga, D.K. Chester, 2015-10-12 The Azores archipelago in the Atlantic Ocean is composed of nine volcanic islands and São Miguel is the largest and most volcanically active During the past 5000 years several eruptions have taken place on the three active central volcanoes Sete Cidades Fogo and Furnas and in the basaltic fissure systems of Picos and Congro There is evidence that Furnas was in eruption when the first settlers arrived some time between 1439 and 1443 In the sixteenth and seventeenth centuries there were two explosive sub Plinian eruptions Fogo in 1563 and Furnas in 1630 The last eruption on land occurred in the Picos Fissural Volcanic System in 1652 involving the extrusion of lava domes In 22 chapters this volume considers the volcanic geology of the island under the headings of geological setting volcanic history geological hazards and risk assessment volcano monitoring and natural resources

From Landscape Research to Landscape Planning Bärbel Tress, Gunter Tres, Gary Fry, Paul Opdam, 2005-10-25 This book provides guidelines for those pursuing landscape projects based on integrative concepts interdisciplinarity and transdisciplinarity whether they are members of an integrative research team or individuals working on a problem that demands integration They must define terminology choose appropriate methodologies overcome epistemological barriers and cope with the high expectations of some stakeholders while encouraging others to participate at all

Daring the Doctorate Ada Demb, 2012-12-15 One of the best kept secrets about doctoral education is the large proportion of students who are mid career Yet few researchers

focus on these students Daring the Doctorate is the first major work to address the life circumstances of these mid career doctoral students Based on the experiences of fifteen successful graduates the author develops perspectives and frameworks to assist those contemplating doctoral study as well as faculty and staff advisors and even recent graduates who wonder whether only they found the road to graduation so complicated In this thorough guide to the doctorate degree study participants speak freely about their reasons for pursuing doctorates as well as the financial personal intellectual and professional challenges they faced Their circumstances reflect a variety of situations single married and partnered some mothers and fathers male and female some as young as twenty six and others approaching their middle ages We learn about their passion for learning about guilt and isolation the time pressures the exhilaration and key supporting roles played by family peers advisors mentors Wizards and Guardians We come away with a profound appreciation of the courage and tenacity of these talented individuals and a better understanding of how to help others like them succeed Politics of Risk-taking Barbara Vis,2010 Barbara Vis is assistant professor in comparative politics at the vu University Amsterdam A Veni grant from the Netherlands Organisation of Scientific Research NWO supports her current research *The High-risk Neonate* Jane K. Sweeney,1986 This groundbreaking volume addresses the major challenges facing practitioners of neonatal treatment the new and exciting subspecialty of pediatric therapy practice Experts fully explore how professionals can provide safe and therapeutic interventionf for high risk neonates and their parents They provide a readable comprehensive overview of neonatal neuropathology neurologic and behavioral assessment and clinical management strategies for newborns at risk for neurological dysfunction The High Risk Neonate is a unique volume that explores the medical complications of the prematurely born neonate and presents outcome data from early physical therapy intervention with infants **Risk Assessment and Countermeasures for Cybersecurity** Almaiah, Mohammed Amin, Maleh, Yassine, Alkhassawneh, Abdalwali,2024-05-01 The relentless growth of cyber threats poses an escalating challenge to our global community The current landscape of cyber threats demands a proactive approach to cybersecurity as the consequences of lapses in digital defense reverberate across industries and societies From data breaches to sophisticated malware attacks the vulnerabilities in our interconnected systems are glaring As we stand at the precipice of a digital revolution the need for a comprehensive understanding of cybersecurity risks and effective countermeasures has never been more pressing Risk Assessment and Countermeasures for Cybersecurity is a book that clarifies many of these challenges in the realm of cybersecurity It systematically navigates the web of security challenges addressing issues that range from cybersecurity risk assessment to the deployment of the latest security countermeasures As it confronts the threats lurking in the digital shadows this book stands as a catalyst for change encouraging academic scholars researchers and cybersecurity professionals to collectively fortify the foundations of our digital world *Teaching, Research and Academic Careers* Daniele Checchi, Tullio Jappelli, Antonio Uricchio,2022-08-12 This open access book evaluates research quality quality of teaching and the

relationship between the two through sound statistical methods and in a comparative perspective with other European countries. In so doing it covers an increasingly important topic for universities that affects university funding. It discusses whether university evaluation should be limited to a single factor or consider multiple dimensions of research since academic careers, teaching and awarding degrees are intertwined. The chapters included in the book evaluate teaching and research also taking the gender dimension into account in order to understand where and when gender discrimination occurs in assessment. Divided into five sections, the book analyses the administrative data on the determinants of career completion of university students, increasing precariousness of academic careers especially of young researchers, methods designed to assess research productivity when co-authorship and team production are becoming the standard practice and interrelations between students' achievements and teachers' careers driven by research assessment. It brings together contributions from a large group of economists, statisticians and social scientists working under a project sponsored by ANVUR, the Italian agency for the evaluation of teaching and research of academic institutions. From an international perspective, the findings in this book are particularly interesting because despite low tuition costs, tertiary education in Italy has relatively low enrolment rates and even lower completion rates compared to those in other European and American countries. This book is of interest to researchers of the sociology of education, education policy, public administration, economics and statistics of education and to administrators and policy makers working in the area of higher education. *A History of Risk Science* Terje

Aven, 2025-08-15. Risk has been handled as long as there have been humans on Earth. However, the risk field is a young discipline. Systematic attempts to access and handle risk explicitly, conceptualizing and expressing risk in society, are a recent endeavour. This book presents a history of risk science and risk analysis, highlighting concepts and principles for understanding, assessing, communicating, managing and governing risk. The author presents and discusses key contributions to risk science using a historical lens and from the perspective of a risk scientist. The book strengthens our understanding of what risk science is and how it has evolved by exploring fundamental topics such as risk characterization, risk perception, risk communication, risk handling and decision making, and concludes with reflection on the future of risk science and, in particular, what we can learn from its history. *A History of Risk Science* will be essential reading for risk researchers and graduate students as well as scholars from associated fields applying risk-related analysis to their work.
