

# Unreached People

(not land masses!)

If the Great Commission is about people, why do we represent it with geographic maps?

Geographic maps show our perception of the world. Maps are perceived as real life, a priority, when geographic maps show regions with huge populations like the West and Asia are highlighted, and the diverse populations of single but large countries like India and China are under-represented. The world map is a cartogram based on 2022 population estimates. Every pixel represents 100,000 people. Shaded by percentage Unreached.
