The Martial Metropolis Us Cities In War And Peace:

The Martial Metropolis Roger W. Lotchin, 1984 Covers the period between the end of World War I and the escalation of the Vietnam conflict during which both U S cities and the U S military came of age The cities chosen have had longstanding and broad partnerships with the military Each city is either broadly representative or typical of some part of the partnership and provides coverage for different services kinds of cities and geographic locations *The Missile Next Door* Gretchen Heefner, 2012-09-10 In the 1960s the Air Force buried 1 000 ICBMs in pastures across the Great Plains to keep U S nuclear strategy out of view As rural civilians of all political stripes found themselves living in the Soviet crosshairs a proud Plains individualism gave way to an economic dependence on the military industrial complex that still persists today *In Pursuit of Privilege* Clifton Hood, 2016-11-08 A history that extends from the 1750s to the present *In Pursuit of Privilege* recounts upper class New Yorkers struggle to create a distinct world guarded against outsiders even as economic growth and democratic opportunity enabled aspirants to gain entrance Despite their efforts New York City s upper class has been drawn into the larger story of the city both through class conflict and through their role in building New York s cultural and economic foundations *In Pursuit of Privilege* describes the famous and infamous characters and events at the center of this extraordinary history from the elite families and wealthy tycoons of the eighteenth and nineteenth centuries to the Wall Street executives of today From the start upper class New Yorkers have been open and aggressive in their behavior keen on attaining prestige power and wealth Clifton Hood sharpens this characterization by merging a history of the New York economy in the eighteenth century with the story of Wall Street s emergence as an international financial center in the late nineteenth and early twentieth centuries as well as the dominance of New York s financial and service sectors in the 1980s Bringing together several decades of upheaval and change he shows that New York s upper class did not rise exclusively from the Gilded Age but rather from a relentless pursuit of privilege affecting not just the urban elite but the city s entire cultural economic and political fabric **Urban Public Policy** Martin V. Melosi, 2010-11 The 1992 Los Angeles riots catapulted the problems of the city back onto the policy agenda The cauldron of social problems of the city as the riots showed offers no simple solutions Indeed urban policy includes a range of policy issues involving welfare housing job training education drug control and the environment The myriad of local state and federal agencies only further complicates formulating and implementing coherent policies for the city This volume while not offering specific proposals to remedy the problems of the city provides a broad historical context for discussing contemporary urban policy and for arriving at new prescriptions for relieving the ills of the American city The essays address issues related to public housing poverty transportation and the environment In doing so the authors discuss larger themes in urban policy as well as provide case studies of how policies have been implemented over time in specific cities Of particular interest are two essays that discuss the role of the historian in shaping urban policy and the importance of historical preservation in urban planning *Arsenal*

of World War II Paul A. C. Koistinen, 2004 Prolific munitions production keyed America's triumph in World War II but so did the complex economic controls needed to sustain that production Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business While that relationship was remarkably successful in helping the U S win the war it also raised troubling issues about wartime economies that have never been fully resolved Paul Koistinen's fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services Koistinen traces the evolution of federal agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942-1945 As the war progressed the WPB and related agencies oversaw the military's supply and procurement systems stabilized the economy while financing the war closely monitored labor relations and controlled the shipping and rationing of fuel and food In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti New Deal corporate elements battled for control over mobilization itself As the armed services emerged as the principal customers of a command economy the military industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will The product of exhaustive archival research *Arsenal of World War II* shows that mobilization meant more than simply harnessing the economy for war it also involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe

Globalizing L.A. Steven P. Erie, 2004 The author chronicles LA's emergence as the nation's leading trade centre and gateway to the Pacific Rim in the 20th century exploring recent epic battles over port development expanding LAX creating a new international airport in Orange County building the Alameda Corridor rail link and more

In the Loop David R. Johnson, 2020-10-06 *In the Loop* A Political and Economic History of San Antonio is the culmination of urban historian David Johnson's extensive research into the development of Texas's oldest city Beginning with San Antonio's formation more than three hundred years ago Johnson lays out the factors that drove the largely uneven and unplanned distribution of resources and amenities and analyzes the demographics that transformed the city from a frontier settlement into a diverse and complex modern metropolis Following the shift from military interests to more diverse industries and punctuated by evocative descriptions and historical quotations this urban biography reveals how city mayors

balanced constituents push for amenities with the pull of business interests such as tourism and the military Deep dives into city archives fuel the story and round out portraits of Sam Maverick Henry B Gonzales Lila Cockrell and other political figures Johnson reveals the interplay of business interests economic attractiveness and political goals that spurred San Antonio s historic tenacity and continuing growth and highlights individual agendas that influenced its development He focuses on the crucial link between urban development and booster coalitions outlining how politicians and business owners everywhere work side by side although not necessarily together to shape the future of any metropolitan area including geographical disparities Three photo galleries illustrate boosterism s impact on San Antonio s public and private space and highlight its tangible results In the Loop recounts each stage of San Antonio s economic development with logic and care building a rich story to contextualize our understanding of the current state of the city and our notions of how an American city can form
