Dialogically Speaking Kenneth Paul Kramer, 2011-01-01 What makes us authentically human According to Maurice Friedman world renowned Martin Buber scholar translator and biographer it is genuine dialogue When there s a willingness for dialogue Friedman says then one must navigate moment by moment It s a listening process Friedman addresses our humanity in ever unique ways through his dialogue with philosophy literature religion and psychotherapy At least two things make this book new Friedman presents his wide ranging thought directly in five original essays forming an intertextual compass which is then elaborated upon by colleagues familiar with his work Second a special feature of this book is found at the end of each part which invites readers to engage with questions drawn from and pointing toward Friedman s writing The book s intended audience includes teachers scholars and students interested in dialogical approaches to any of the human sciences In a time when we are in danger of losing our human birthright Friedman s interdisciplinary insights point us again to the touch of the other

The Return of Ethics and Spirituality in Global Development Mahmoud Masaeli, Rico Sneller, 2020-06-02 The theory of modernization basically reduces the meaning of development to economic growth often measured by Growth Domestic Product of the country or overall purchase power parity of the nation This approach ignores

the variety of perspectives on development hence excludes the role of culture identity and spirituality as social determinants of good development More importantly modernization theory which informs the mainstream view on development ignores the structural causes of underdevelopment including colonial heritage or the current unbridled capitalism in many societies Against reductionist views of development fundamental questions are raised about the theory and programming of development From what perspective is the conception of development perceived Who should decide and depict development goals What kind of development could result in desirable changes Is it morally desirable to dictate an exclusively Western understanding of development to others Is there any link between development and a right of nations to self determination Who is morally accountable for global inequality or bad development The novelty of this book lies in its multidisciplinary approach in exploring the role of ethics and spirituality as the curing alternates for the gamut of ills which originate in global inequality All authors are academics based in a variety of countries and specialize in questions concerning development and spirituality

Dialogue in Organizations M. Reitz,2015-04-14 In politics business and society better leadership and dialogue are seen as antidotes to the paradoxical issues of the modern world This book illustrates how the compulsion for busyness the assumptions about who leaders are and the adherence to implicitly held cultural norms threaten the possibility of effective dialogue in organizations
